Name	Address	Voting rights ratio	Capital contribution ratio	Profit ratio
Subsidiaries:				
Dong Thap BMC Transport Joint Stock Company	Cao Lanh, Dong Thap	51,0%	51,0%	51,0%
Dong Thap BMC Construction Design Consulting Joint Stock Company	Cao Lanh, Dong Thap	67,9%	67,9%	67,9%

Associates as of June 30, 2026, include:

<u>Name</u>	<u>Address</u>
Investment and Construction Enterprise Branch	Cao Lanh, Dong Thap
Dong Thap BMC Construction Quality Testing and Inspection Center Branch	Cao Lanh, Dong Thap
Concrete Factory Branch	Cao Lanh, Dong Thap
Cao Lanh Construction Materials Store	Cao Lanh, Dong Thap
Xeo Vat Construction Materials Store	Chau Thanh, Dong Thap

1.6 Operation characteristics of the Company affecting the financial statements

In June 2025, the Company was granted licenses by the competent authority to exploit 02 sand mines for a period of 3 years from 2025-2027. According to the plan, the exploitation output in 2026 is estimated at approximately 2.1 million m³, corresponding to an expected revenue of approximately 150 billion VND. At the same time, during the year, the Company restructured its operations and transferred a number of land plots to restructure capital sources and improve asset utilization efficiency.

2. ACCOUNTING PERIOD AND ACCOUNTING CURRENCY

2.1 Annual accounting period

The annual accounting period of the Company begins on 01 January and ends on 31 December.

2.2 Accounting currency

The accounting currency is VND.

3. APPLICABLE ACCOUNTING STANDARDS AND SYSTEM

3.1 Applicable accounting system

Effective from the 2026 fiscal year, the Company applies the Enterprise Accounting System in accordance with Circular No. 99/2025/TT-BTC dated October 27, 2025, issued by the Ministry of Finance (TT99), replacing Circular No. 200/2014/TT-BTC dated December 22, 2014, issued by the Ministry of Finance (TT200) providing guidance on the enterprise accounting system.

3.2 Statement of compliance with Vietnamese Accounting Standards and Vietnamese Accounting System

The accompanying separate financial statements are presented in Vietnamese Dong (VND), based on the historical cost principle and in accordance with Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System issued under TT99, and other current accounting regulations in Vietnam

3.3 Basis for preparation of interim financial statements

The separate financial statements for the second quarter and the six-month period ended June 30, 2026, have been prepared in accordance with Vietnamese Accounting Standards, the Enterprise Accounting System issued under TT99, and other relevant current regulations.

These separate financial statements do not include all the notes required for annual financial statements and should therefore be read in conjunction with the Company's most recent separate financial statements for the fiscal year ended December 31, 2025.

Within the scope of these separate financial statements, the Company focuses on presenting significant transactions and fluctuations that occurred during the period.

3.4 Applicable accounting method

The Company applies the General Journal accounting method

4. KEY APPLIED ACCOUNTING POLICIES

4.1 Foreign currencies

- The exchange rate applied when recognizing and revaluing assets is the buying rate of the commercial bank where the Company regularly transacts;
- The exchange rate applied when recognizing and revaluing liabilities is the selling rate of the commercial bank where the Company regularly transacts.

Transactions in foreign currencies are recorded at the actual transaction exchange rate on the transaction date. Differences in exchange rates arising during settlement are recognized in the income statement for the period. Balances of monetary items, receivables, and payables denominated in foreign currencies, except for prepayments to suppliers, prepaid expenses, and deferred revenue in foreign currencies, are exchanged into the reporting currency at the actual transaction exchange rate on the balance sheet date. The net difference in exchange rates arising from the revaluation of foreign currency balances at the end of the period are recognized in profit or loss for the period.

4.2 Cash and cash equivalents

Cash and Cash equivalents include Cash on hand and Cash in banks.

4.3 Financial investments

Held-to-maturity investments

Held-to-maturity investments include items such as term deposits.

Investments in equity of other entities

Investments in subsidiary

An investment is classified as an investment in a subsidiary when the Company has control over the policies and operations, usually demonstrated by holding more than 50% of the voting rights.

Investments in subsidiaries are reported at cost, including the purchase price and any directly related costs of investment (if any). In the case of investments using non-monetary assets, the cost of the investments is recorded at the fair value of the non-monetary assets at the time of the transaction.

Dividends and profits distributed in the period after the investment date are recognized as financial income at fair value on the receivable date.

Investments in Associates

An investment is classified as an investment in associates when the Company holds directly or indirectly from 20% to less than 50% of the voting rights of the investee without any other agreement.

Investments in associates are reflected at cost, including the purchase price and any costs directly related to the investment (If any). In the case of investments in non-monetary assets, the cost of the investments is recorded at the fair value of the non-monetary assets at the Date of occurrence.

Dividends and profits distributed for the period after the Date of investment are recognized as revenue from financial activities at fair value on the Date the right to receive arises.

Other investments

Investments classified as other investments are investments other than investments in subsidiary, joint venture, and associate.

Other investments are reported at cost, including the purchase price and any directly related costs. If the investment is made with non-monetary assets, the cost of the investment is recognized at the fair value of the non-monetary assets at the transaction date.

Method for provisioning for devaluation in financial investment

For long-term financial investments

At the time of preparing financial statements, for other investments that are not listed securities or registered for trading on the domestic stock market and are not freely traded securities on the market, a loss allowance for other investments is made when there is a basis indicating a decrease in value compared to the enterprise's investment value, with the level of provision in accordance with the provisions of Circular No. 48/2019/TT-BTC dated August 08, 2019 of the Ministry of Finance, but not exceeding the actual investment value being recorded in the accounting books.

4.4 Receivables

Recognition principle

Receivables, including trade and other receivables, are presented at their book value after deducting allowances for doubtful debts.

Principle for provisioning for doubtful debts

At the reporting date, a provision for doubtful debts is established for overdue receivables and receivables not yet due but likely to be uncollectible on time. The provision is made in accordance with Circular No. 48/2019/TT-BTC dated August 8, 2019, of the Ministry of Finance and the assessment of the Board of Directors to ensure that the value of receivables does not exceed the recoverable amount.

Increases or decreases in the allowance account balance are recognized in general administrative expenses on the income statement.

4.5 Inventories

Recognition principle for Inventory

Inventories are recorded at the lower of cost and net realizable value. The cost of inventories includes all purchase costs, conversion costs and other costs incurred in bringing the inventories to their present location and condition. For manufactured products, the

cost includes all direct material costs, direct labor costs and general production costs based on usual operation.

The purchase cost of inventories includes the purchase price, non-refundable taxes, transportation costs, handling charges, storage costs during the purchasing process and other costs directly related to the acquisition of inventories. Trade discounts and provision for devaluation of inventories due to non-conforming or substandard goods are deducted from the purchase cost.

Net realizable value is the estimated selling price less the estimated costs of completion and the estimated costs of marketing, selling and distribution.

Valuation method of Inventory

The cost of inventories is determined by the FIFO method.

Accounting method of Inventory

Inventories are accounted for using the perpetual inventory method.

Accounting method of provision for devaluation in inventories

At the reporting date, provision for devaluation of inventories is made for damaged, deteriorated, obsolete, slow-moving inventories and inventories with a book value higher than the net realizable value with the provision made in accordance with the guidance in Circular No. 48/2019/TT-BTC dated August 8, 2019, of the Ministry of Finance to ensure that the value of inventories does not exceed market value.

Increases or decreases in the allowance for inventory obsolescence are recognized in the cost of goods sold on the income statement.

The provision for devaluation of inventories is determined on an item-by-item basis.

Raw materials, supplies and tools reserved for production purposes are not provided for if the products they contribute to will be sold at or above their production cost.

4.6 Tangible fixed assets

Tangible fixed assets are presented at cost less accumulated depreciation.

Initial recognition and measurement principle

The cost of tangible fixed assets includes the purchase price and all costs directly related to bringing the assets to a ready-to-use condition.

Depreciation method

The cost of tangible fixed ASSETS is depreciated using the straight-line method over the ASSETS estimated useful life.

The estimated useful lives for certain asset categories are as follows:

- | | |
|---|---------------|
| • Buildings and architectural structures | 10 – 20 years |
| • Machinery and equipment | 06 – 30 years |
| • Transportation and transmission equipment | 06 – 10 years |
| • Office equipment | 04 – 07 years |
| • Other assets | 10 – 20 years |

4.7 Intangible fixed assets

Intangible fixed assets are reported at cost less accumulated amortization.

Initial recognition and measurement principle

Cost represents all expenditures incurred by the company to acquire the intangible fixed asset up to the point it is ready for its intended use.

Accounting principles for intangible fixed assets

Land use rights

Land use rights with indefinite useful lives are not amortized.

Computer software

Computer software that is not an integral part of the related hardware is recognized as an intangible asset and amortized over its useful life.

4.8 Leases

Classification of leases

A financial lease is a lease that transfers significant risks and rewards incidental to ownership of an asset to the lessee. All other leases are classified as operating leases.

Finance leases

Leased assets under financial leases are recognized as assets and liabilities on the balance sheet at the same amounts equal to the fair value of the leased asset at the starting date of the lease.

If the fair value of the leased asset exceeds the present value of the minimum lease payments, the latter is used for recognition.

Lease payments under finance leases are apportioned between finance charges and reduction of the lease principal. Finance charges are allocated to each accounting period during the lease term at a constant periodic rate of interest on the remaining balance of the liability for each period.

Assets acquired under finance leases are depreciated using the straight-line method over their estimated useful lives, similar to owned assets, in case of the lease term is shorter, specifically as follows:

Tran Quoc Toan Industrial Park Infrastructure

40 years

Operating leases

Lease payments under operating leases are recognized as operating expenses on a straight-line basis over the lease term.

4.9 Lease of assets

Operating leases

Assets under operating leases are recognized on the balance sheet according to the asset classification of the Company.

Initial direct costs incurred in generating revenue from operating leases are recognized immediately as expenses in the period or allocated gradually as expenses over the lease term according to the lease contract. Operating lease revenue is recorded in the income statement for the period on a straight-line basis over the lease term, regardless of the payment method.

Depreciation of assets under operating leases is performed consistently with the depreciation policy of the lessor for similar assets.

4.10 Investment properties

Investment properties are stated at cost less accumulated depreciation.

Recognition principles for investment properties

The cost of an investment property is the total cash or cash equivalents paid or the fair value of the consideration given to acquire the investment property up to the time of purchase or construction. The cost of an investment property includes directly attributable transaction costs.

Depreciation method for investment properties

Investment properties are depreciated using the straight-line method.

The estimated depreciation period for land use rights is 25 years.

Transfers from owner-occupied property to investment property (IP) or from IP to owner-occupied property or inventory only occur when there is a change in use, such as when inventory is transferred to IP because the owner begins to lease it out under an operating lease.

Changes in the purpose of use between IP and owner-occupied property or inventory do not change the carrying amount of the transferred asset and do not change the cost of the property for valuation or financial reporting purposes.

4.11 Construction in progress

Assets under construction for production, rental, administrative or other purposes are recorded at cost. This cost includes related service charges and borrowing costs, recognized in accordance with accounting policy of the Company. Depreciation of these assets, similar to other assets, commences when the asset is available for use.

4.12 Prepaid expenses

Prepaid expenses are classified as current and non-current based on their original terms and primarily relate to the cost of tools, equipment, and prepaid land lease payments. These expenses are depreciated over the prepayment period or during the period which economic benefits are expected to be realized.

4.13 Liabilities

Liabilities are classified as payables to sellers and other payables according to the principle: Payables to sellers are payables of a commercial nature arising from transactions of buying and selling goods, services, assets, and the seller is an entity independent of the buyer; The remaining payables are classified as other payables.

Liabilities are tracked by original term, remaining term at the reporting Date, by original currency, and by counterparty.

Liabilities are recognized at no less than the obligation to pay.

4.14 Borrowing costs

All other interest expenses are recognized in the income statement as incurred.

4.15 Accrued expenses

Accrued expenses represent future payment obligations related to goods and services received from vendors during the reporting period but not yet paid due to missing invoices or incomplete accounting documentation. These are recognized in the cost of production or sales during the reporting period.

4.16 Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation. Provisions are not recognized for future operating losses.

Provisions are recognized based on the estimated costs required to settle the obligation. If the effect of the time value of money is material, the provision is measured at its present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as borrowing costs.

4.17 Unearned revenue

Unearned revenue includes prepayments, such as amounts received from customers in advance for one or more accounting periods for the lease of assets.

Periodically, deferred revenue is calculated, determined, and recognized in the revenue of the period in accordance with the lease term of the assets.

Under TT99, all rental revenue is recognized on an accrual basis. For lease contracts where rent is received in advance for multiple periods, revenue is allocated according to the lease term.

Rental payments received in advance from customers are recorded as deferred revenue and are gradually allocated to revenue over the relevant periods.

4.18 Equity

Contributed capital

Contributed capital is recorded based on the actual capital contributed of the shareholders.

Profit distribution

Net profit after corporate income tax may be distributed to shareholders after approval by the General Meeting of Shareholders and after allocations in compliance with Vietnamese law.

4.19 Revenue and other income

Revenue from sales

Revenue from sales is determined based on the fair value of amounts received or to be received receivable. In most cases, revenue is recognized when the significant risks and rewards of ownership are transferred to the buyer.

Revenue from service rendered

Revenue from service rendered is recognized when the outcome of the transaction can be reliably estimated. For service transactions spanning multiple periods, revenue is recognized in each period based on the completed portion at the balance sheet date.

Interest income

Interest income is recognized on an accrual basis, determined by the outstanding balance of deposit accounts and the applicable interest rate.

4.21 Revenue deductions

Revenue deductions include returned goods.

Revenue deductions occurring in the same period as the sale are offset against revenue in that period. Deductions occurring after the sales period but before the financial statement release date are offset against revenue in the reporting period. Deductions occurring after the sales period and after the financial statement release date are offset against revenue in the period the deduction occurred.

4.22 Cost of goods sold

Cost of goods sold and services rendered represents the total cost incurred for finished goods, merchandise, services, and investment properties sold during the period, in accordance with revenue recognition principles.

4.23 Financial expenses

Financial expenses reflect costs incurred during the period, mainly including borrowing costs.

4.24 Selling and General & Administrative expenses

Selling expenses reflect actual costs incurred during the process of selling products, goods, and providing services, including labor costs, fuel, depreciation of fixed assets, advertising, transportation, etc.

General and administrative expenses reflect the general management costs of the enterprise, including salaries for administrative staff (wages, salaries, allowances, etc.); social insurance, health insurance, trade union fees, and unemployment insurance for administrative staff; office material costs, labor tools, depreciation of fixed assets used for management; land rent, license tax; provision for doubtful debts; outsourced services (electricity, water, telephone, fax, etc.); and other cash expenses (hospitality, etc.).

4.25 Taxes

Current corporate income tax (CIT) expense

Current CIT expense is determined based on taxable income and the current year's CIT rate of 20%.

Value added tax

Value added tax of goods and services provided by the Company is calculated at a tax rate of 10%.
Land use rights transfer: Not subject to tax.

According to Resolution No. 204/2025/QH15 passed by the National Assembly Standing Committee June 17, 2025, the Company is entitled to apply the VAT tax rate of 8% to finished products sold during the year as prescribed from January 01, 2025 to the end of December 31, 2026.

Other taxes

Applied in accordance with current tax laws in Vietnam.

The Company's tax reports will be subject to inspection by the tax authorities. As the application of tax laws and regulations to many different types of transactions can be interpreted in many

different ways, the amount of tax presented on the financial statements may be changed according to the final decision of the tax authorities.

4.26 Related parties

Related parties are enterprises or individuals who, directly or indirectly through one or more intermediaries, control, are controlled by, or are under common control with the Company. Affiliated companies, individuals directly or indirectly holding voting rights in the Company leading to significant influence over the Company, key management personnel including directors and executive officers of the Company, close family members of these individuals, or companies affiliated with these individuals are also considered related parties.
