Corporate Income Tax

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)**

**Current Corporate Income Tax (CIT) Expense**

Current CIT expense is determined based on taxable income and the current CIT rate of 20%.

**Deferred CIT Expense**

Deferred CIT expense is determined based on deductible temporary differences, taxable temporary differences, and the CIT rate expected to apply in the year the asset is recovered or the liability is settled, based on the tax rates (and tax laws) in effect at the end of the financial year.

Deferred income tax payable must be recognized for all taxable temporary differences, except for:

- Deferred income tax payable arising from the initial recognition of an asset or liability from a transaction that does not affect accounting profit or taxable income (or tax loss) at the time the transaction occurs;
- Temporary taxable differences related to investments in subsidiaries, branches, associates, and joint ventures are recognized when the timing of the reversal of the temporary difference is controllable and it is certain that the temporary difference will not be reversed in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences, the carry-forward value of taxable losses, and unused tax credits when it is certain that taxable profits will be available in the future to utilize these deductible temporary differences, taxable losses, and unused tax credits, except for:

- Deferred tax assets arising from the initial recognition of an asset or liability from a transaction that does not affect accounting profit or taxable income (taxable loss) at the time of the transaction.
- Deferred tax assets for all deductible temporary differences arising from investments in subsidiaries, affiliates, associates, and joint ventures are recognized only when it is certain that the temporary difference will be reversed in a foreseeable future and that there is taxable profit to utilize that temporary difference.

The carrying value of deferred corporate income tax assets is reviewed at the end of the accounting period and reduced to the extent that it is certain there is sufficient taxable profit to allow the use of part or all of the deferred income tax asset. Previously unrecognized deferred corporate income tax assets are reviewed at the end of the accounting period and recognized when it is certain there is sufficient taxable profit to utilize those previously unrecognized deferred income tax assets.

Current income tax and deferred income tax are recognized as income or expense for the purpose of calculating profit or loss for the period in which they arise, except where income tax arising from a transaction or event is recognized directly in equity in the same period or a different period.

The Corporation may only offset deferred income tax assets and deferred income tax liabilities when the Corporation has a legal right to offset current income tax assets against current income tax payable and deferred income tax assets against deferred income tax liabilities relating to corporate income tax administered by the same tax authority, and the Corporation intends to settle current income tax liabilities and current income tax assets on a net basis or by recovering the assets concurrently with the settlement of liabilities in each future period when material amounts of deferred income tax liabilities or deferred income tax assets are settled or recovered.
