Notes to the consolidated financial statements for six-month period ended 30 June 2026
(continued)

Form B 09 – DN/HN
*((Issued under Circular No. 43/2026/TT-BTC
dated 20 April 2026 of the Ministry of Finance))*

The accounting policies that have been adopted by the Corporation and its subsidiaries in the preparation of these consolidated financial statements are consistent with those adopted in the preparation of the latest annual consolidated financial statements,

(a) Basis of consolidation

(i) Subsidiaries

Subsidiaries are entities controlled by the Corporation. The financial statements of the subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases,

(ii) Non-controlling interests

Non-controlling interests ("NCI") are measured at their proportionate share of the acquiree's identifiable net assets at date of acquisition,

Changes in the Corporation's interest in a subsidiary that do not result in a loss of control are accounted for as transactions with owners. The difference between the change in the Corporation's share of net assets of the subsidiary and any consideration paid or received is recorded directly in retained profits under equity,

(iii) Associates

Associates are those entities in which the Corporation has significant influence, but not control, over the financial and operating policies. Associates are accounted for using the equity method. They are initially recognised at cost, which includes transaction costs. Subsequent to initial recognition, the consolidated financial statements include the Corporation's share of the profit or loss of the equity accounted associates, after adjustments to align the accounting policies with those of the Corporation, from the date that significant influence commences until the date that significant influence ceases. The carrying amount of investments in equity accounted investees is also adjusted for the alterations in the investor's proportionate interest in the investees arising from changes in the investee's equity that have not been included in the income statement (such as revaluation of fixed assets, or foreign exchange translation differences, etc.),

When the Corporation's share of losses exceeds its interest in an equity accounted associate, the carrying amount of that interest (including any long-term investments) is reduced to nil and the recognition of further losses is discontinued except to the extent that the Corporation has an obligation or has made payments on behalf of the associate,

(iv) Transactions eliminated on consolidation

Intra-group transactions, balances, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised gains and losses arising from transactions with equity accounted associates are eliminated against the investment to the extent of the Corporation's interest in the associate,

(b) Foreign currency transactions

Transactions in currencies other than VND during the year have been translated into VND at rates approximating actual rates of exchange ruling at the transaction dates,

Form B 09 – DN/HN

All foreign exchange differences are recorded in the consolidated statement of income,

(c) Cash and cash equivalents

Cash comprises cash balances and call deposits, Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes,

(d) Investments

(e) Accounts receivable

Trade and other receivables are stated at cost less allowance for doubtful debts,

(f) Inventories

Inventories are stated at the lower of cost and net realisable value, Cost is determined on a weighted average basis and includes all costs incurred in bringing the inventories to their present location and condition, Cost in the case of finished goods and work in progress includes raw materials, direct labour and attributable manufacturing overheads, Net realisable value is the estimated selling price of inventory items, less the estimated costs of completion and estimated costs to sell,
