7. **Statement on Comparability of Financial Statements:** The interim financial statements for the first nine months of the fiscal year ending December 31, 2025 are fully consistent and comparable with the interim financial statements for the first nine months of the fiscal year ending December 31, 2024 and the financial statements for the fiscal year ending December 31, 2024.

II. FISCAL YEAR , CURRENCY USED IN ACCOUNTING**1. Fiscal year**

fiscal year begins on January 1 and ends on December 31 of each year.

2. Currency used in accounting

The currency used in accounting is Vietnamese Dong (VND) because revenue and expenditure are mainly made in VND.

III. ACCOUNTING STANDARDS AND REGIMES APPLIED**1. Applicable accounting regime**

The Company applies the Vietnamese Enterprise Accounting Regime issued under Circular No. 200/2014/TT-BTC dated December 22, 2014 of the Minister of Finance and circulars guiding the implementation of accounting standards and regimes of the Ministry of Finance.

2. Statement on compliance with accounting standards and accounting regimes

The Board of Directors ensures that it has complied with the requirements of the accounting standards and the Vietnamese Enterprise Accounting Regime issued under Circular No. 200/2014/TT-BTC dated December 22, 2014 of the Minister of Finance as well as the circulars guiding the implementation of accounting standards and regimes of the Ministry of Finance in preparing the Financial Statements.

3. Applicable accounting form

The company uses a computerized general journal form of accounting.

NAGAKAWA GROUP JOINT STOCK COMPANY

Address : Xuan Thuong 1 Residential Group, Phuc Yen Ward, Phu Tho Province, Vietnam

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

IV. ACCOUNTING POLICIES APPLIED

1. Basis for preparing Consolidated Financial Statements

The consolidated financial statements are prepared on the accrual basis of accounting (except for information relating to cash flows).

The affiliated units form their own accounting apparatus and perform dependent accounting. The consolidated financial statements of the entire Company are prepared based on the consolidation of the financial statements of the affiliated units. Revenue and balances between affiliated units are excluded when preparing the consolidated financial statements.

2. Cash and cash equivalents

Cash includes cash on hand, demand deposits, monetary gold used for value storage purposes, excluding gold classified as inventories used for the purpose of raw materials to produce products or goods for sale.

Cash equivalents are short-term investments with a maturity of no more than three months from the date of purchase, which are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

3. Types of exchange rates applied in accounting and principles of accounting for exchange rate differences

The company has transactions in foreign currencies: USD.

Exchange rate differences arising during the period and exchange rate differences due to revaluation of foreign currency items at the end of the period are recorded in income or expenses during the period. Exchange rate differences due to revaluation of foreign currency balances at the end of the period are implemented according to the guidance of Circular 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance.

Transactions in foreign currencies are translated at the exchange rate on the date of the transaction. Balances of foreign currency items at the end of the period are translated at the exchange rate on the balance sheet date.

Exchange rate differences arising during the period from foreign currency transactions of foreign currency items and exchange rate differences due to revaluation of foreign currency items at the end of the period after offsetting the increase and decrease are recorded in financial income or financial expenses.

Particularly in the construction investment phase to form fixed assets before the Company goes into production and business activities (pre-operation phase), the exchange rate difference arising when paying for foreign currency items to carry out construction investment and the exchange rate difference arising when re-evaluating foreign currency items at the end of the accounting period are reflected cumulatively on the Balance Sheet (index Exchange rate difference). This exchange rate difference is gradually allocated to financial operating revenue or financial expenses within a period of no more than 5 years from the date the project is put into operation.

The exchange rate used to convert foreign currency transactions is the actual exchange rate at the time of the transaction of the commercial bank where the Company transacts. The exchange rate used to re-evaluate the balance of foreign currency items at the end of the period is the buying rate of the commercial bank or the average buying rate of the commercial banks where the Company opens an account announced at the end of the accounting period.

NAGAKAWA GROUP JOINT STOCK COMPANY

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

4. Principles of accounting for financial investments

Held-to-maturity investments

Investments are classified as held-to-maturity when the Company has the intention and ability to hold them until maturity. Held-to-maturity investments include: term deposits (including treasury bills and promissory notes), bonds, preference shares that the issuer must redeem at a certain time in the future, and loans held to maturity for the purpose of earning periodic interest and other held-to-maturity investments.

Held-to-maturity investments are initially recognized at cost, which includes the purchase price and any transaction costs incurred in connection with the purchase of the investments. After initial recognition, these investments are recognized at their recoverable amount. Interest income from investments held to maturity after the acquisition date is recognized in the Income Statement on an accrual basis. Interest earned before the Company holds the investments is deducted from the cost at the acquisition date.

When there is strong evidence that part or all of an investment may not be recovered and the amount of loss can be reliably determined, the loss is recorded in financial expenses in the year and the investment value is directly deducted.

Investments in subsidiaries, joint ventures and associates

Subsidiary

A subsidiary is an entity controlled by the Company. Control is achieved when the Company has the power to govern the financial and operating policies of an investee so as to obtain benefits from its activities.

Joint venture company

A joint venture is a company established on the basis of a contractual agreement under which the Company and the participating parties carry out economic activities on the basis of joint control. Joint control is understood as the making of strategic decisions related to the operating and financial policies of the joint venture company must have the consensus of the parties participating in the joint venture.

Affiliated companies

An associate is an entity in which the Company has significant influence, but not control, over the financial and operating policies. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control over those policies.

Investments in subsidiaries, joint ventures and associates are initially recorded at cost, including the purchase price or capital contribution plus costs directly related to the investment. In case of investment in non-monetary assets, the cost of the investment is recorded at the fair value of the non-monetary assets at the time of arising.

Dividends and profits from periods prior to the investment being purchased are recorded as a reduction in the value of the investment itself. Dividends and profits from periods subsequent to the investment being purchased are recorded as revenue. Dividends received in the form of shares are only recorded as the number of shares increased, not the value of the shares received/recorded at par value.

Provision for losses on investments in subsidiaries, joint ventures and associates is made when the subsidiary, joint venture or associate suffers a loss, with the provision equal to the difference between the actual capital contribution of the parties in the subsidiary, joint venture or associate and the actual equity multiplied by the Company's capital contribution ratio compared to the total actual capital contribution of the parties in the subsidiary, joint venture or associate. If the subsidiary, joint venture

NAGAKAWA GROUP JOINT STOCK COMPANY

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

or associate is the subject of the consolidated financial statements, the basis for determining the provision for losses is the consolidated financial statements.

Increase or decrease in the amount of provision for investment losses in subsidiaries, joint ventures and associates that must be set up at the end of the fiscal year is recorded in financial expenses.

5. Trade and other receivables

Trade and other receivables are recorded as incurred. Receivables are stated at carrying amount less allowance for doubtful debts.

The classification of receivables as trade receivables, internal receivables and other receivables is carried out according to the following principles :

- Trade receivables reflect commercial receivables arising from purchase-sale transactions between the Company and buyers who are independent entities , including receivables from export sales entrusted to other entities .
- Internal receivables reflect receivables from affiliated units without legal status and dependent accounting.
- Other receivables reflect non-commercial receivables not related to purchase and sale transactions.

Provision for doubtful debts is established for each doubtful debt based on the age of overdue debts or the expected level of loss that may occur, specifically as follows:

- For overdue receivables:
 - 30% of the value for overdue receivables from 6 months to less than 1 year.
 - 50% of the value for receivables overdue from 1 year to less than 2 years.
 - 70% of the value for receivables overdue from 2 years to less than 3 years.
 - 100% of the value for receivables 3 years or older.

For receivables that are not overdue but are unlikely to be recovered: establish provisions based on the expected loss level.

6. Principles of inventory recognition

Inventories are stated at the lower of cost and net realizable value.

The cost of inventories is determined as follows:

- Raw materials, goods: include purchase costs and other directly relevant costs incurred in bringing inventories to their present location and condition.
- Finished goods: include costs of raw materials, direct labor and related manufacturing overheads allocated based on normal levels of activity
- Work in progress costs: only include costs of main raw materials, labor costs, depreciation costs of assets used for production activities and general production costs related to production activities.

Net realizable value is the estimated selling price of inventories in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

Inventories are valued using the weighted average cost method and are accounted for using the perpetual inventory method.

NAGAKAWA GROUP JOINT STOCK COMPANY

Address : Xuan Thuong 1 Residential Group, Phuc Yen Ward, Phu Tho Province, Vietnam

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

Provision for inventory devaluation is established for each inventory item whose original cost is greater than its net realizable value. For unfinished services, provision for devaluation is calculated for each type of service with a separate price. Increases and decreases in the balance of provision for devaluation of inventory that must be established at the end of the fiscal year are recorded in cost of goods sold.

7. Principles of recording and depreciating fixed assets

a) Principles of recognition and depreciation of tangible fixed assets

Tangible fixed assets are stated at cost less accumulated depreciation. The cost of tangible fixed assets includes all costs incurred by the Company to acquire tangible fixed assets up to the date the asset is ready for use. Expenses incurred after initial recognition are only recorded as an increase in the cost of tangible fixed assets if it is certain that these costs will increase future economic benefits from the use of the asset. Expenses that do not satisfy the above conditions are recorded immediately as expenses.

When tangible fixed assets are sold or disposed of, their cost and accumulated depreciation are eliminated from the accounts and any gain or loss resulting from their disposal is recognized in income or expenses for the year.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives. The depreciation years for various types of tangible fixed assets are as follows:

<u>Type of fixed assets</u>	<u>No. 5</u>
Houses and structures	10 – 25
Machinery and equipment	06 – 10
Means of transport and transmission	06 – 08
Management equipment and tools	03-05
Other fixed assets	0 5

8. Intangible fixed assets

Intangible fixed assets are stated at cost less accumulated depreciation.

The cost of intangible fixed assets includes all costs incurred by the Company to acquire the fixed assets up to the date the asset is ready for use. Expenses related to intangible fixed assets incurred after initial recognition are recognized as production and business expenses in the period unless these expenses are associated with a specific intangible fixed asset and increase the economic benefits from these assets.

When intangible fixed assets are sold or disposed of, their cost and accumulated depreciation are eliminated from the accounts and any gain or loss resulting from their disposal is recognized as income or expense in the year.

The Company 's intangible fixed assets include:

Software program

Costs relating to computer software programs that are not part of the related hardware are capitalised. The cost of computer software is the total cost incurred by the Company up to the date the software is put into use. Computer software is amortised on a straight-line basis over 5 years.

NAGAKAWA GROUP JOINT STOCK COMPANY

Address : Xuan Thuong 1 Residential Group, Phuc Yen Ward, Phu Tho Province, Vietnam

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

9. Principles of accounting for prepaid expenses

Prepaid expenses record actual expenses that have been incurred but are related to the business performance of many accounting periods and the transfer of these expenses to the business performance of the following accounting periods.

Tools, instruments

Tools and equipment put into use are allocated to expenses using the straight-line method over an allocation period of no more than 03 years.

Major repair costs

Factory repair costs are allocated to expenses by the straight-line method with an allocation period of no more than 03 years.

10. Principles of accounting for liabilities

Payables are tracked in detail by payment term, payee, currency type and other factors according to the management needs of the enterprise.

Payables that meet the definition of foreign currency monetary items are revalued at the end of the period when preparing the Financial Statements.

11. Cost of unfinished basic construction

Construction in progress reflects costs directly related (including related interest expenses in accordance with the Company's accounting policy) to assets under construction and machinery and equipment under installation, for production, rental and management purposes as well as costs related to ongoing repairs of fixed assets. These assets are recorded at original cost and are not depreciated.

12. Principles for recording loans and financial lease liabilities

The company must monitor in detail the payment terms of loans and financial leases. For loans with a repayment period of more than 12 months from the date of the financial statements, accountants present them as long-term loans and financial leases. For loans due within the next 12 months from the date of the financial statements, accountants present them as short-term loans and financial leases to have a payment plan.

For finance lease liabilities, the total lease liability reflected on the credit side of account 341 is the total amount payable calculated by the present value of the minimum lease payments or the fair value of the leased asset.

Loans and debts in foreign currency must be converted into accounting currency at the actual transaction exchange rate at the time of occurrence;

- When paying debts or borrowing in foreign currency, the Debit side of account 341 is converted according to the actual accounting exchange rate for each subject;
- When preparing the Financial Statements, the balance of loans and financial leases in foreign currencies must be re-evaluated at the actual transaction exchange rate at the time of preparing the Financial Statements.
- Exchange rate differences arising from the payment and end-of-period revaluation of loans and financial leases in foreign currencies are recorded in financial revenue or expenses.

13. Accounts Payable and Accrued Expenses

Liabilities and accruals are recognized for amounts to be paid in the future for goods and services received. Accruals are recognized based on reasonable estimates of the amounts to be paid.

NAGAKAWA GROUP JOINT STOCK COMPANY

Address : Xuan Thuong 1 Residential Group, Phuc Yen Ward, Phu Tho Province, Vietnam

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

The classification of payables as trade payables, accrued expenses, internal payables and other payables is made according to the following principles:

- Trade payables reflect commercial payables arising from transactions of purchasing goods, services, assets and the seller is an independent entity of the Company, including payables when importing through a consignee.
- Payable expenses reflect amounts payable for goods and services received from sellers or provided to buyers but not yet paid due to lack of invoices or insufficient accounting records and documents, and amounts payable to employees for leave wages and production and business expenses that must be accrued in advance.
- Internal payables reflect payables between the parent unit and the subordinate unit without legal entity status that has dependent accounting status.

Other payables reflect non-commercial payables not related to the purchase, sale or provision of goods or services.

14. Provisions for payables

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the passage of time is material, provisions are determined by discounting the expected future cash outflows to settle the obligation at a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to the passage of time is recognized as a finance expense.

The Company's payable provisions include:

Product and goods warranty reserve

Product and goods warranty cost provisions are established for each type of product and goods with warranty commitments.

The provision for product and goods warranties is from 0.5% - 1% of the revenue from products and goods. This rate is estimated based on data on warranty costs in previous years and the weighted ratio of all possible consequences with corresponding probabilities. Increases and decreases in the provision for product and goods warranties that need to be set up at the end of the fiscal year are recorded in the cost of sales.

Construction warranty reserve

Construction warranty reserves are established for each construction project with a warranty commitment.

The warranty provision is equal to 5% of the revenue from construction works requiring warranty. This rate is estimated based on data on warranty costs in previous years and the weighted rate of all possible consequences with corresponding probabilities. When the warranty period expires, the unused or under-used construction warranty provision is recorded in other income.

NAGAKAWA GROUP JOINT STOCK COMPANY

Address : Xuan Thuong 1 Residential Group, Phuc Yen Ward, Phu Tho Province, Vietnam

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

15. Principles of equity recognition

Owner's equity

Owner's equity is recorded at the actual amount invested by shareholders.

Share capital surplus

Share premium is recorded as the difference between the issue price and the par value of shares when first issued, additional issued or the difference between the reissue price and the book value of treasury shares. Direct costs related to the additional issuance of shares and reissue of treasury shares are recorded as a reduction in share premium.

Other equity

Other capital is formed by supplementing the results of business operations, revaluation of assets and the remaining value between the fair value of donated, presented, and sponsored assets after deducting taxes payable (if any) related to these assets.

Treasury stock

When the Company repurchases shares issued by the Company, the payment including transaction-related expenses is recorded as treasury shares and reflected as a deduction in equity. When reissuing, the difference between the reissue price and the book value of treasury shares is recorded in the Capital Surplus indicator.

Retained earnings

Record business results (profit, loss) after corporate income tax and the situation of profit distribution or loss handling of the enterprise.

Other funds

Funds are set aside and used in accordance with the Company Charter and the Resolution approved annually by the General Meeting of Shareholders.

16. Profit distribution

Profit after corporate income tax is distributed to shareholders after setting aside funds according to the Company 's shareholders' meeting resolution as well as legal regulations.

The distribution of profits to shareholders takes into account non-cash items included in retained earnings that may affect cash flows and the ability to pay dividends, such as : Gains from revaluation of assets contributed as capital, gains from revaluation of monetary items, financial instruments and other non-monetary items.

Dividends are recognized as liabilities upon approval by the General Meeting of Shareholders.

17. Principles and methods of revenue recognition

Revenue from sales of goods and finished products

Revenue from sales of goods and finished products is recognized when all of the following conditions are simultaneously satisfied:

- The enterprise has transferred the significant risks and rewards of ownership of the products or goods to the buyer.
- The enterprise no longer holds the right to manage the goods as the owner of the goods or the right to control the goods.

NAGAKAWA GROUP JOINT STOCK COMPANY

Address : Xuan Thuong 1 Residential Group, Phuc Yen Ward, Phu Tho Province, Vietnam

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

- Revenue is determined with relative certainty. When a contract provides that the buyer has the right to return the purchased goods under specific conditions, revenue is only recognized when those specific conditions no longer exist and the buyer is no longer entitled to return the goods (except in cases where the customer has the right to return the goods in exchange for other goods or services).
- The enterprise has obtained or will obtain economic benefits from the sales transaction.
- Identify the costs associated with a sales transaction.

Service revenue

Revenue from a service transaction is recognized when the outcome of the transaction can be reliably estimated. In cases where the service is performed over several periods, revenue is recognized in a period based on the results of the work completed at the end of the accounting period. The outcome of a service transaction is determined when all the following conditions are satisfied:

- Revenue is measured reliably. When a contract provides for the buyer to return the services under specific conditions, revenue is recognized only when the specific conditions no longer exist and the buyer is not entitled to return the services provided.
- It is possible to obtain economic benefits from the transaction of providing that service.
- Identify the portion of work completed as of the end of the fiscal year.
- Identify the costs incurred for the transaction and the costs to complete the transaction to provide that service.

Interest

- Interest is recognized on an accrual basis, determined on the deposit account balance and the actual interest rate for each period.

18. Accounting principles for revenue deductions

Sales deductions include: Trade discounts, sales allowances and sales returns.

Trade discounts, sales discounts, and sales returns arising in the same period as the consumption of products, goods, and services are adjusted to reduce revenue of the period in which they arise;

In case products, goods and services have been consumed in previous periods, but trade discounts, sales discounts or returned goods arise in the following period, the enterprise is allowed to record a reduction in revenue according to the following principles:

- + If products, goods, and services have been consumed in previous periods, and must be discounted, discounted, or returned in the next period but occur before the issuance of the Financial Statement, the accountant must consider this an event that requires adjustment occurring after the date of the Balance Sheet and record a reduction in revenue on the Financial Statement of the reporting period (previous period).
- + In case products, goods, and services must be discounted, have trade discounts, or are returned after the issuance of the Financial Statement, the enterprise shall record a reduction in revenue for the period in which they arise (the following period).

19. Principles of accounting for cost of goods sold.

Cost of goods sold during the year is recorded in accordance with revenue generated during the period and ensures compliance with the principle of prudence.

NAGAKAWA GROUP JOINT STOCK COMPANY

Address : Xuan Thuong 1 Residential Group, Phuc Yen Ward, Phu Tho Province, Vietnam

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

For direct material costs consumed in excess of normal levels, labor costs, and fixed general manufacturing costs not allocated to the value of products in stock, accountants must immediately calculate them into the cost of goods sold (after deducting compensation, if any) even when the products and goods have not been determined to be consumed.

The provision for inventory price reduction is included in the cost of goods sold based on the quantity of inventory and the difference between the net realizable value being less than the original cost of inventory. When determining the volume of inventory with price reduction requiring provision, the accountant must exclude the volume of inventory for which a sales contract has been signed (with a net realizable value not lower than the book value) but has not yet been transferred to the customer if there is certain evidence that the customer will not abandon the contract.

20. Principles of financial cost accounting

Reflects financial operating expenses including expenses or losses related to financial investment activities, costs of lending and borrowing capital, costs of contributing capital to joint ventures and associations, losses on transferring short-term securities, costs of selling securities; Provisions for devaluation of trading securities, provisions for losses on investments in other entities, losses arising from selling foreign currencies, exchange rate losses...

21. Principles of accounting for sales costs and business management costs

Selling costs reflect actual costs incurred in the process of selling products, goods, and providing services, including costs of offering, introducing products, advertising products, sales commissions, product and goods warranty costs (except construction activities), preservation, packaging, transportation costs, etc.

Business management costs reflect the general management costs of the enterprise, including costs for salaries of employees in the business management department (salaries, wages, allowances, etc.); social insurance, health insurance, union fees, unemployment insurance for business management employees; costs of office materials, labor tools, depreciation of fixed assets used for business management; land rent, business license tax; provision for bad debts; outsourced services (electricity, water, telephone, fax, property insurance, fire and explosion insurance, etc.); other cash expenses (reception, customer conferences, etc.).

22. Principles and methods of recording current corporate income tax expenses

Current corporate income tax expense

Corporate income tax expense is current income tax, calculated on taxable income. Taxable income differs from accounting profit due to adjustments for temporary differences between tax and accounting, non-deductible expenses, and adjustments for non-taxable income and losses carried forward.

The company is obliged to pay corporate income tax at a rate of 20%.

23. Financial instruments

i. Financial assets

Classification of financial assets

The Company classifies its financial assets into the following groups: financial assets recorded at fair value through the Income Statement, investments held to maturity, loans and receivables, and available-for-sale financial assets. The classification of these financial assets depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Financial assets are recorded at fair value through the Statement of Business Performance

NAGAKAWA GROUP JOINT STOCK COMPANY

Address : Xuan Thuong 1 Residential Group, Phuc Yen Ward, Phu Tho Province, Vietnam

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

Financial assets are classified as measured at fair value through the Statement of Income if they are held for trading or designated as such at fair value through the Statement of Income upon initial recognition.

Financial assets are classified as held for trading securities if:

- Purchased or created primarily for the purpose of resale in the short term;
- The Company intends to hold for the purpose of short-term profit;
- Derivative financial instruments (except for derivative financial instruments that are identified as a financial guarantee contract or a designated and effective hedging instrument).

Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company has the intention and ability to hold to maturity.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments and are not listed on an active market.

Financial assets available for sale

Available-for-sale financial assets are non-derivative financial assets that are designated as available-for-sale or that are not classified as financial assets at fair value through profit or loss, held-to-maturity investments, or loans and receivables.

Initial book value of financial assets

Financial assets are recorded on the date of acquisition and derecognized on the date of sale. At the time of initial recognition, financial assets are determined at the purchase price/issue costs plus other costs directly attributable to the acquisition and issuance of the financial assets.

ii. Financial liabilities

The Company classifies financial liabilities into groups: financial liabilities recorded at fair value through the Income Statement, financial liabilities determined at amortized cost. The classification of financial liabilities depends on the nature and purpose of the financial liabilities and is determined at the time of initial recognition.

Financial liabilities are recorded at fair value through the Statement of Profit and Loss.

A financial liability is classified as measured at fair value through the Statement of Income if it is held for trading or designated as such at fair value through the Statement of Income upon initial recognition.

Financial liabilities are classified as held for trading securities if:

- Issued or created primarily for the purpose of repurchasing in the short term;
- The Company intends to hold for the purpose of short-term profit;
- Derivative financial instruments (except for derivative financial instruments that are identified as a financial guarantee contract or a designated and effective hedging instrument).

Financial liabilities are measured at amortized cost.

Financial liabilities are measured at amortised cost which is determined by taking the financial liability at initial recognition less principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

NAGAKAWA GROUP JOINT STOCK COMPANY

Address : Xuan Thuong 1 Residential Group, Phuc Yen Ward, Phu Tho Province, Vietnam

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

The effective interest method is a method of calculating the amortized cost of a financial liability or group of financial liabilities and allocating interest income or expense over the relevant period. The effective interest rate is the rate at which estimated future cash flows that will be paid or received over the expected life of the financial instrument or, if appropriate, shorter, are discounted to the net present carrying amount of the financial liability.

Initial book value of financial liabilities

At the time of initial recognition, financial liabilities are measured at issue price plus costs directly attributable to the issuance of such financial liabilities.

iii. *Equity instruments*

An equity instrument is a contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities.

24. Stakeholders

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence.

In considering a related party relationship, attention is given to the substance of the relationship rather than the legal form.

Transactions with related parties during the period are presented in note VII.1

2. Financial risk management

The Company's operations expose it to the following financial risks: credit risk, liquidity risk and market risk. The Board of Directors is responsible for establishing policies and controls to minimize financial risks as well as monitoring the implementation of established policies and controls.

A, Credit risk

Credit risk is the risk that a party to a contract will not be able to perform its obligations, leading to financial loss for the Company.

The Company is exposed to credit risks primarily from its trade receivables, bank deposits and loans.

Accounts receivable from customers

The company minimizes credit risk by only dealing with financially sound entities, requiring letters of credit or collateral for first-time transactions or entities with no known financial capacity. In addition, accounts receivable staff regularly monitor receivables to urge collection.

The Company's trade receivables are related to many units and individuals, so the concentration of credit risk for trade receivables is low.

Bank deposits

NAGAKAWA GROUP JOINT STOCK COMPANY

Address : Xuan Thuong 1 Residential Group, Phuc Yen Ward, Phu Tho Province, Vietnam

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

The Company's term and non-term bank deposits are held in well-known banks in Vietnam, so the credit risk for bank deposits is low.

Loans

The company lends money to its subsidiaries and key management members. These entities and individuals are all reputable and have good payment capacity, so the credit risk for the loans is low.

B, Liquidity risk

Liquidity risk is the risk that the Company will have difficulty meeting its financial obligations due to lack of funds.

The Company's liquidity risk arises mainly from the fact that its financial assets and financial liabilities have different maturities.

The Company manages liquidity risk through the following measures: regularly monitoring current and expected future payment requirements to maintain an appropriate amount of cash and loans, monitoring actual cash flows versus expectations to minimize the impact of fluctuations in cash flows. (presentation of liquidity risk management policy)

The maturity of non-derivative financial liabilities (excluding interest payable) is based on contractual payment terms and is undiscounted as follows:

	From 1 year down	Over 1 year to 5 years	Over 5 years	Add
Final balance				
Loans and debts	1,425,014,674,693	-	-	1,425,014,674,693
Payable to seller	290.152.717.585	-	-	290.152.717.585
Other payables	34.800.092.096	-	-	34.800.092.096
Add	1,749,967,484,374	-	-	1,749,967,484,374
Beginning of the year number				
Loans and debts	1,135,906,992,519	-	-	1,135,906,992,519
Payable to seller	147.902.947.738	-	-	147.902.947.738
Other payables	11,736,332,651	-	-	11,736,332,651
Add	1,295,546,272,908	-	-	1,295,546,272,908

The Board of Directors believes that the risk to the repayment of debt is low. The Company is able to meet its debts as they fall due from cash flows from operations and proceeds from maturing financial assets. The Company has access to sufficient sources of funding and loans maturing within 12 months can be rolled over with existing lenders.

C, Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

Market risks related to the Company's operations include: foreign currency risk, interest rate risk, stock price risk and commodity/raw material price risk.

Foreign currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

NAGAKAWA GROUP JOINT STOCK COMPANY

Address : Xuan Thuong 1 Residential Group, Phuc Yen Ward, Phu Tho Province, Vietnam

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

The company imports raw materials for production and exports products with the main transaction currency being USD, so it is affected by fluctuations in exchange rates.

The Company manages risks related to exchange rate fluctuations by optimizing debt payment terms, forecasting foreign exchange rates, maintaining a reasonable loan and debt structure between foreign currencies and VND, choosing the time to buy and pay foreign currencies at low exchange rates, and optimally using existing cash resources to balance exchange rate risks and liquidity risks.

Commodity/raw material price risk

The Company is exposed to the risk of fluctuations in commodity/raw material prices. The Company manages its commodity/raw material price risk by closely monitoring relevant market information and situations to appropriately manage the timing of purchases, production plans and inventory levels.

The Company has not used derivative instruments to hedge commodity/raw material price risks.

3. Fair value of financial assets and liabilities

	Book value		Fair value

The fair values of financial assets and financial liabilities are included at the amount at which they could be exchanged in a current transaction between knowledgeable, willing parties.

The Company uses the following methods and assumptions to estimate the fair value of its financial assets and financial liabilities:

- The fair value of cash and cash equivalents, trade receivables, loans, other receivables, borrowings, trade payables and other short-term payables is equivalent to the book value (less the provision for the estimated uncollectible portion) of these items due to their short maturity.
- The fair value of held-to-maturity investments and available-for-sale financial assets listed on the stock market is the published transaction price at the end of the fiscal year/accounting period. For unlisted held-to-maturity investments and available-for-sale financial assets with transaction prices

INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The first 9 months of the fiscal year ending December 31, 2025

Notes to the Interim Consolidated Financial Statements (continued)

announced by 3 securities companies at the end of the accounting period, the fair value of these investments is the average price based on the transaction prices announced by 3 securities companies.

- Fair value of loans, trade receivables, other receivables, borrowings, trade payables and other long-term payables, held-to-maturity investments that are not listed on the stock market and do not have a trading price announced by 3 securities companies is estimated by discounting cash flows at interest rates applicable to debts with similar characteristics and remaining maturity.

The Company has not yet conducted an official valuation of unlisted available-for-sale financial assets and there is no published trading price of the three securities companies. However, the Board of Directors assesses that the fair value of these financial assets is not materially different from the carrying value.

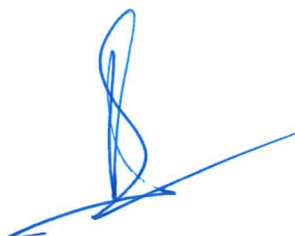

Established on October 30, 2025
