1. Production and business activities

1.1. Implementation results.

According to the financial report, the production and business results of the Corporation in 2024 are as follows:

Unit: Million VND

TT	Main indicators	Implementation 2023	Plan 2024	Implementation 2024	Implementation 2024/	Implementation 2024 / Plan
----	-----------------	---------------------	-----------	---------------------	----------------------	----------------------------

					Implementation 2023	2024

2	Total Cost	225,917	189,000	156,607	69.3%	82.9%
3	Profit before tax	(8,820)	3,300	(27,308)	-	-

1.2. Comments, reviews.

The Corporation's operations in 2024 encountered a number of reasons, so the basic revenue and profit indicators were still low. The main reasons:

- Competition among contractors is increasingly fierce while the Corporation's resources are still limited, dependent on partners, difficult to find projects that ensure efficiency and prudence in capital use.

- Some investors encountered problems in site clearance procedures, so some projects that had signed contracts were behind schedule, leading to a shortage of revenue from these projects in 2024.

- The domestic stock market fluctuated a lot during the year and decreased sharply in the last months of the year, causing the provision for financial investment (VTB shares) to be significant, affecting the profit results recorded according to regulations.

- Lack of expected revenue from the failure to organize the offering of shares of the Corporation at the company with capital contribution causes the expected profit to decrease.

Details of some basic indicators are as follows:

a. About revenue.

- Revenue from direct sales and service provision at the Corporation reached 119.8 billion VND, equal to 59.3% compared to the same period in 2023. Of which: Revenue from direct business activities at the Corporation reached, from exploitation cooperation activities, from the School's operating revenue.

- Financial revenue including dividends, deposits, and other revenue reached 8.9 billion VND. Of which: Dividends from units with invested capital reached 7.7 billion VND. Including: VTB, Belco; CMT; Viemco.

b. About Cost - Profit.

- Total cost is at VND 156,607 billion, equal to 82.9% of the annual plan and 69.3% compared to the same period in 2023.

- Total profit before tax (27,308) billion VND.

3. Transfer of land arrangement and project investment.

a. According to Decree 03 of the newly issued Government, it is expected that the Corporation is not subject to the scope of application, and the real estate areas managed by the Corporation are not subject to transition to be arranged and handled according to regulations.

This partly reduces the paperwork and procedures in completing legal documents for the premises and real estate of the Corporation and its member units under management according to regulations.

b. Investment work.

- E5 Cau Giay Project: According to the announcement of Hanoi City, the project has decided to terminate the assignment of the investor to study and establish the project. The Corporation and related units are waiting for further instructions from the Departments and agencies of Hanoi City to resolve the next procedures in accordance with regulations. It is expected that the Hanoi People's Committee is assigning the Department of Finance to consider providing instructions on procedures for units to receive back previous deposits.

- Investment activities such as restructuring VTC School and other investment activities are carried out according to specific plans, submitted to the Board of Directors for approval before implementation.

4. Implementation of restructuring project.

a. Implementation of restructuring and divestment policies at a number of units.

In 2024, implementing the policy issued by the Board of Directors, the Corporation has organized steps according to the procedure to transfer capital contributions at companies with capital contributions. The implementation process has reached the stage for interested investors to register to participate, deposit and vote. However, according to the policy of SCIC shareholders, the Board of Directors has issued a Resolution on stopping divestment at enterprises while SCIC reviews the situation, progress and results of the implementation of the Corporation's restructuring project for the period 2021-2025.

Failure to divest capital at Vietcom is one of the reasons affecting operating results in 2024.

In the coming time, the Corporation will continue to review and update as required to implement the restructuring project after approval, enhancing the operational efficiency of the enterprise.

b. Implementing the restructuring plan to improve the operational efficiency of VTC School.

In order to implement the relevant Resolution of the General Meeting of Shareholders, the Board of Directors as well as the approved restructuring plan of the Corporation for the period 2021-2025, the Executive Board in 2024 has searched for and negotiated with a number of potential partners, as well as implemented a number of related tasks. There are a number of interested investors, but we need to wait for more specific instructions to carry out the synchronous restructuring, ensuring the School operates stably and effectively.

5. Other jobs at the Corporation.

a. Human resources, labor, wages and administration.

- Based on the 2024 salary fund plan and the Regulations to implement payment and management of labor and salary. The Corporation fully implements policies for employees according to regulations.

- The Corporation has completed the amendment and supplementation of the Wage Regulations in accordance with the current operating situation of the Corporation as well as legal regulations; The Democracy Regulations and Collective Labor Agreement were issued in September 2024.

- The Corporation has completed the documents and procedures to appoint 02 Deputy General Directors of the Corporation. The official decision will be issued at the end of December 2024.

b. Representative work of the Corporation at units with contributed capital.

- The Corporation, through its Representative, has participated in the development of production and business plans of enterprises; received Informatics and periodic/ad hoc reports from the Representative at enterprises and units to review the operating situation and coordinate to monitor and supervise the operations of enterprises on the basis of the 2024 target plan approved by the General Meeting of Shareholders of the enterprise.

- The Corporation, through its Representative, participates in the development, amendment and supplementation of internal regulations/rules of enterprises under the management of the Corporation according to the current Representative Regulations as well as other relevant regulations and rules.

c. Informatics disclosure work.

agencies such as the State Securities Commission, Vietnam Securities Depository and Clearing Corporation (VSDC), Hanoi Stock Exchange (HNX) and shall be published on the Corporation's website.

II. 2024 PERFORMANCE RESULTS AT ENTERPRISES WITH INVESTED CAPITAL OF THE CORPORATION.

The production and business activities of companies with Viettronics' capital contribution in 2024 achieved lower results compared to the same period in 2023 and compared to the 2024 plan. The main reasons are: the demand for products and goods in the production and business fields of enterprises in the domestic and world markets is still very low; high land costs, meeting environmental and fire prevention requirements, causing additional related costs, etc. These are basic and objective difficulties that directly affect the operational efficiency of enterprises.

The current difficulties that most businesses are facing are high land rental costs, increasingly difficult production due to slow consumption and fierce competition.

In addition, some enterprises have not yet had their land lease contracts with the state extended, so their exploitation activities to improve efficiency are limited and they cannot access the Government's policies to reduce land rent and support businesses.

2. Inspection and Supervision Results of the Supervisory Board

2.1 Business Performance and Financial Situation According to the Audited Consolidated Financial Statements of 2024:

- Total revenue and other income: VND 129,299,079,921, reaching 67.23% of the plan.
- Total pre-tax accounting profit: VND -27,308,331,983, failing to meet the plan.

Revenue from direct self-operated activities at the Corporation's headquarters from economic contracts in the fields of industrial electricity, building electromechanics, and land exploitation reached VND 117.38 billion, accounting for approximately 90.78% of total revenue and other income. Financial revenue from dividends, bank deposit interest, and foreign exchange gain reached VND 8.91 billion, accounting for about 6.89% of total revenue and other income. Total revenue and other income in 2024 decreased by 40.45% compared to 2023 due to limited capacity in bidding, leading to fewer signed contracts, slow disbursement by investors, lower dividend distribution to the Corporation compared to 2023, and the suspension of divestment from subsidiaries with the Corporation's investment, significantly affecting business performance.

Total expenses in 2024 decreased by 30.68% compared to 2023, reaching 82.86% of the 2024 plan. Cost of goods sold decreased in line with sales revenue, while administrative expenses slightly increased compared to 2023 due to salary adjustments under the new wage policy and certain consulting, valuation, and audit costs. Financial expenses rose significantly compared to 2023 due to provisions for long-term financial investments, mainly for listed shares of VTB.

The failure to meet the pre-tax accounting profit target was primarily due to the revenue shortfall and long-term financial investment provisions.

Viettronics Technology College, a dependent accounting unit of the Corporation, achieved financial balance in its regular activities due to successfully signing cooperative training contracts.

- Financial position as of December 31, 2024, according to the audited consolidated financial statements:

+ Total assets: VND 494,033,280,289

In there:

- Short-term assets: VND 215,894,152,155
- Long-term assets: VND 278,139,128,134

+ The Corporation has organized accounting, financial reporting, and auditing activities in compliance with regulations.

+ Inventory checks, debt confirmation, long-term financial investment provisions, and re-evaluation of foreign currency monetary items at the end of the financial year were properly conducted.

2.2 Business Performance and Financial Situation According to the Audited Consolidated Financial Statements of 2024:

Key indicators from the consolidated financial statements:

- Total revenue and other income: VND 315,483,802,404
- Total pre-tax accounting profit: VND 8,135,930,074
- Total assets: VND 746,081,373,701
