Circular 200/2014/TT-BTC dated 22/12/2014

Km35 - National Highway 10 - An Quang Commune - Hai Phong City

# NOTE OF CONSOLIDATED FINANCIAL STATEMENTS

Second Quarter of 2025

## I. COMPANY OPERATIONAL CHARACTERISTICS

### 1. Capital Ownership Form

Amecc Mechanical Construction Joint Stock Company was established and operates under the Business Registration Certificate for Joint Stock Company No. 0200786983 issued on February 1, 2008, and amended for the 20th time on February 27, 2023, by the Department of Planning and Investment of Hai Phong City.

The company's headquarters is located at Km 35, National Highway 10, An Quang Commune, Hai Phong City.

#### 2. Business Field

- Installation of water supply and drainage systems, heating, and air conditioning systems;
- Construction of residential buildings;
- Construction of non-residential buildings;
- Repair and maintenance of transportation equipment (excluding cars, motorcycles, motorbikes, and other motor vehicles);
- Rental of machinery, equipment, and other tangible goods without operators. Details: Rental of machinery and equipment for agriculture and forestry; rental of construction machinery and equipment; rental of office machinery and equipment (including computers)
- Construction of other civil engineering works. Details: Construction of industrial park infrastructure and urban area infrastructure.
- Construction of railway works.
- Construction of road works.
- Construction of water supply and drainage works. Details: Construction of irrigation works.
- Construction of processing and manufacturing facilities. Details: Construction of industrial works.
- Architectural and related technical consultancy activities. Details: Consulting and designing heating systems for industrial and civil projects; designing ventilation, air conditioning, and heating systems for civil and industrial buildings; technical design for civil and industrial projects; mechanical-electrical design for civil and industrial buildings; road design; construction site layout design; architectural design; interior and exterior design.
- Wholesale of metals and metal ores. Details: Wholesale of iron, steel, copper, lead, and cast iron.
- Other education not elsewhere classified. Details: Training in mechanics; training in shipbuilding and repair.
- Specialized design activities. Details: Design of floating structures.
- Other manufacturing not elsewhere classified. Details: Manufacturing and fabricating non-standard equipment.
- Manufacture of lifting, lowering, and handling equipment. Details: Manufacturing and fabricating lifting and transferring machines.
- Manufacture of basic chemicals.
- Real estate business, land use rights under ownership, use rights, or lease. Details: Office, factory, and warehouse rental.
- Manufacture of boilers (excluding central heating boilers).
- Manufacture of other metal products not elsewhere classified. Details: Manufacture of metal kitchen, bathroom, and
  dining items; manufacture of safes, strongboxes, armored doors; manufacture of metal cables; manufacture of nails,
  staples, rivets, screws, chains; manufacture of ship propellers, anchors, bells, railway rails, hooks, hinges, locks;
  manufacture of pressure-resistant pipes.
- Repair of electrical equipment; demolition; installation of electrical systems; completion of construction projects.
- Pipeline transportation; coastal and ocean freight transport.
- Rental of motor vehicles; wastewater drainage and treatment; site preparation.
- Forging, pressing, stamping, and rolling of metals; powder metallurgy; mechanical processing; metal treatment and coating.
- Installation of other construction systems. Details: Installation of elevators, escalators, automatic doors; installation of lighting systems, sound systems, vacuum systems.
- Other specialized construction activities. Details: Dredging of waterways; repair of construction works.
- Manufacture of tanks, reservoirs, and metal containers;
- Repair of machinery and equipment; installation of industrial machinery and equipment.
- Wholesale of agricultural machinery, equipment, and spare parts.

Km35 - National Highway 10 - An Quang Commune - Hai Phong City

- Wholesale of other machinery, equipment, and spare parts. Details: Wholesale of mining and construction machinery, equipment, and spare parts; wholesale of electrical machinery, equipment, and materials (generators, electric motors, wires, and other electrical circuit equipment); wholesale of machinery, equipment, and spare parts for textiles, garments, and footwear; wholesale of office machinery, equipment, and spare parts (excluding computers and peripherals); wholesale of marine machinery, equipment, and spare parts.
- Freight transport by rail; inland water freight transport; warehousing and storage of goods.
- Shipbuilding and floating structures; building of sport and leisure boats.
- Freight transport by road.
- Manufacture of metal structures; repair of prefabricated metal products.

#### 3. Business Structure

As of June 30th, 2025, The company has 01 subsidiary, specifically as follows: *Subsidiary company* 

Amecc Myanmar Company Limited.

### 4. Consoliated Financial Statement

The Company's consolidated financial statements reflect the entire financial position and business performance related to the Company's production and business activities. The financial statements of the units used for preparing and presenting the consolidated financial statements include:

Company Name	Headoffice	Owners hip ratio	Charter capital actually contributed as of 30/06/2025	Main business activities
Parent Company Công ty cổ phần cơ khí xây dựng AMECC	Hai Phong	100,0%	600.000.000.000	Processing, manufacturing, installation of steel
Subsidiary Amecc Myanmar Company Limited	Myanmar	100,0%	11.625.270.000	structures, trading business  Processing, manufacturing,
		38		installation of steel structures, trading business

# II. ACCOUNTING PERIOD, CURRENCY USED IN ACCOUNTING

#### 1. Accounting period, currency used in accounting

The financial year of the Company starts on January 1st and ends on December 31st. The currency used in accounting is the Vietnamese Dong (VND).

# III. APPLICABLE ACCOUNTING STANDARDS AND REGIMES

#### 1. Applied Accounting Regime

The company adopts the Vietnamese accounting system issued under Circular No. 200/2014/TT-BTC dated December 22, 2014 by the Ministry of Finance, which provides guidance on the accounting regime for enterprises; Circular No. 53/2016/TT-BTC dated March 21, 2016 by the Ministry of Finance amends and supplements some provisions of Circular No. 200/2014/TT-BTC dated December 22, 2014 by the Ministry of Finance on the enterprise accounting regime; Circular No. 202/2014/TT-BTC dated December 22, 2014, issued by the Ministry of Finance, provides guidance on the method of preparation and presentation of consolidated financial statements, and other legal documents as prescribed by the state.

# 2. Statement on Compliance with Accounting Standards and Accounting Regime

The company has adopted the Vietnamese Accounting Standards and the guiding documents on standards issued by the state. The Consolidatedfinancial statements are prepared and presented in accordance with all regulations of each standard, circulars guiding the implementation of the standards, and the current Accounting Regime being applied.

### IV. APPLIED ACCOUNTING POLICIES

1. Basis of Consolidated financial statement

The Company's consolidated financial statements are prepared based on the consolidation of the Company's separate financial statements and the financial statements of subsidiaries controlled by the Company (subsidiaries) as of December 31. Control is achieved when the Company has the ability to govern the financial and operating policies of the investee companies to derive benefits from their operations.

The financial statements of the subsidiaries are prepared for the same financial year as the Company's financial statements, applying accounting policies consistent with those of the Company. If necessary, the financial statements of the subsidiaries are adjusted to ensure consistency in the accounting policies applied across the Company and its subsidiaries. The financial statements of Amecc Myanmar Co., Ltd. are converted from Kyat to VND.

The results of operations of subsidiaries acquired or disposed of during the period are included in the consolidated financial statements from the date of acquisition or until the date of disposal of the investment in those subsidiaries.

Non-controlling interests represent the portion of profit or loss and net assets not owned by the Company's shareholders and are presented separately in the consolidated balance sheet and consolidated income statement.

#### 2. Principle for recognizing cash and cash equivalents

Economic transactions in foreign currencies are converted into Vietnamese dong at the actual exchange rate at the time the transaction occurs. At the end of the period, foreign currency monetary items are converted at the buying rate of the commercial bank where the company holds its accounts, as published on the last day of the fiscal year.

Cash equivalents are short-term investments with a maturity of no more than three months, which can be easily converted into cash and carry minimal risk of conversion into cash from the date of purchase as of the reporting date

### 3. Accounting Principle for Financial Investments

#### Held-to-Maturity Investments

Held-to-maturity investments include investments which the Company intends and is able to hold until maturity. These investments are primarily time deposits made with banks. Held-to-maturity investments are recognized from the purchase date and are initially measured at cost, including purchase price and any costs directly attributable to the transaction. Interest income from held-to-maturity investments acquired after the purchase date is recognized in the income statement on an accrual basis. Interest received before the company takes possession is deducted from the cost at the time of purchase.

Held-to-maturity investments are carried at amortized cost, less any provision for impairment. A provision for impairment of held-to-maturity investments is established according to current accounting standards.

#### Investments in Associa Investment in Associates

An associate is a company in which the Company has significant influence but is neither a subsidiary nor a joint venture of the Company. In the consolidated financial statements, investments in associates are accounted for using the equity method.

# Investments in Equity Instruments of Other Entities

Investments in equity instruments of other entities represent investments in equity instruments where the Company does not have control, joint control, or significant influence over the investee.

Investments in equity instruments of other entities are recorded at historical cost, less any provisions for impairment of the investment..

#### 4. Accounting Principle for Accounts Receivable

Accounts receivable represent amounts recoverable from customers or other parties. Accounts receivable are presented at their book value less any provision for doubtful debts.

A provision for doubtful debts is established based on the assessment by the management for receivables that are overdue or for receivables where the debtor is unlikely to make payment due to liquidation, bankruptcy, or similar difficulties.

#### 5. Accounting Principle for Inventory

Inventory is valued at cost, or at net realizable value if this is lower than cost. The cost of inventory includes purchase costs, processing costs, and other direct costs incurred to bring the inventory to its present location and condition.

The cost of inventory is determined using the quarterly weighted average cost method. Net realizable value is determined by estimating the selling price less the estimated costs to complete the product and the estimated costs of marketing, selling, and distribution.

Inventory is accounted for using the perpetual inventory system.

A provision for inventory impairment is established in accordance with current accounting standards. Accordingly, the company is allowed to make a provision for obsolete, damaged, or poor-quality inventory and in cases where the cost of the inventory exceeds its net realizable value at the end of the fiscal year.

## AMECC MECHANICAL CONSTRUCTION JSC

Km35 - National Highway 10 - An Quang Commune - Hai Phong City Circular 200/2014/TT-BTC dated 22/12/2014

# 6. Accounting Principle for Recognition and Depreciation of Fixed Assets

Accounting Principles for Tangible and Intangible Fixed Assets

Tangible and intangible fixed assets are recognized at cost. Throughout their use, tangible and intangible fixed assets are accounted for at historical cost, accumulated depreciation, and residual value;

Depreciation is recorded using the straight-line method. The depreciation period is determined according to the duration specified in Circular No. 45/2013/TT-BTC dated April 25, 2013, by the Ministry of Finance and other amending and supplementary legal documents as prescribed by the state.

Accounting Principles for Finance Lease Assets

A lease contract is classified as a finance lease if the lessor transfers substantially all the risks and rewards incidental to ownership to the company. Finance lease fixed assets are recorded at the lower of the fair value of the asset and the present value of the minimum lease payments at the start of the lease term.

Finance lease fixed assets are depreciated like the company's own fixed assets. If there is uncertainty about the purchase of the leased fixed asset, depreciation is calculated based on the lease term if the lease term is shorter than its useful life.

# 7. Accounting Principle for Prepaid Expenses

Prepaid expenses include actual costs incurred that relate to the results of production and business activities over multiple accounting periods. Prepaid expenses include large value tools and equipment that are expected to bring economic benefits to the Company in the future. These costs are capitalized in the form of prepaid expenses and are allocated to the income statement using the straight-line method according to current accounting regulations.

# 8. Accounting Principle for Accounts Payable

Criteria for Classifying Payables

- Accounts Payable to Suppliers includes payables arising from commercial transactions related to the purchase of goods, services, and assets. This category includes payables arising from imports through consignees.
- Internal Payables consist of amounts owed between the company as the parent entity and its subsidiaries or branches that do not have separate legal entity status and operate on a dependent accounting basis.
- Other Payables are remaining payables that are not classified as payable to customers or internal payables.

Payables are accounted for in detail for each party and each payable item, with detailed tracking of payment terms and monitoring in the original currency.

Payables with a remaining maturity of less than 12 months (less than one business cycle) at the time of preparing the financial statements (BCTC) are classified as short-term debt; other payables not classified as short-term debt are classified as long-term debt. When preparing the financial statements, payables are reclassified according to this principle.

The company reassesses the accounts payable in foreign currencies at each financial statement date. The actual transaction exchange rate used for revaluation of accounts payable to suppliers is the selling exchange rate of the commercial bank where the company designates customers to make payments at the time of preparing the financial statements, or where the company regularly transacts.

The company will recognize a payable immediately when there is evidence that a definite loss has occurred, following the prudence principle. Accounts payable are not recorded at less than the value of the obligation. Provisions for accounts payable are established at the time of preparing the financial statements according to current regulations.

# 9. Accounting Principle for Loan Recognition

The value of loans is recorded according to each disbursement and repayment. Loans are accounted for in detail and monitored by each lender, borrower, loan agreement, type of asset borrowed, loan term, and currency of the loan. When preparing the financial statements, the balance of loans in foreign currency is revalued according to the selling rate of the bank where the company has loan transactions.

# 10. Accounting Principle for Recognition and Capitalization of Borrowing Costs

Borrowing costs are recognized as production and operating expenses in the year they occur, except when they are capitalized in accordance with the accounting standard "Borrowing Costs." According to this standard, borrowing costs that are directly attributable to the acquisition, construction, or production of qualifying assets, which take a substantial period of time to get ready for their intended use or sale, are added to the cost of the assets until such assets are ready for their intended use or sale. Income generated from the temporary investment of specific borrowings is deducted from the cost of the asset related to these borrowings. For borrowings specifically obtained to construct fixed assets or investment properties, interest is capitalized regardless of whether the construction period is less than 12 months. The capitalization rate for borrowing costs during the period is 0%.

### AMECC MECHANICAL CONSTRUCTION JSC

Km35 - National Highway 10 - An Quang Commune - Hai Phong City

Circular 200/2014/TT-BTC dated 22/12/2014

# 11. Accounting Principle for Recognition of Accrued Expenses

Accrued expenses reflect amounts payable for goods and services already received from suppliers or provided to buyers but not yet paid because invoices have not been received or sufficient accounting documentation is not yet available. These are recorded as production and business expenses based on the principle of matching revenues with expenses. Once the necessary accounting documents are available, if there is a discrepancy with the amounts previously accrued, the accounts are adjusted by recording additional expenses or reducing the expenses corresponding to the difference.

# 12. Accounting Principle for Recognition of Equity Capital

Recognition of Owner's Contributed Capital and Share Premium

The invested capital from owners is recorded based on the actual amount contributed by the owners. Share premium is recorded based on the difference, whether positive or negative, between the actual issue price and the par value of the shares at the time of initial public offering, additional issuance, or reissuance of treasury shares.

Recognition of Retained Earnings

Retained earnings after tax include the profits from the company's operations after subtracting adjustments due to retrospective application of changes in accounting policies and correction of material errors from previous years. Profits are distributed to owners according to the annual resolutions of the shareholders' meeting.

# 13. Principles and Methods for Revenue Recognition

Revenue from Sales

Revenue from sales is recognized when the following conditions are simultaneously met:

- The majority of risks and benefits associated with the ownership of products or goods have been transferred to the buyer.
- The company no longer retains managerial control over the goods as an owner or controller.
- The revenue can be reliably measured.
- The company has received or will receive economic benefits from the sales transaction.
- The costs associated with the sales transaction can be determined.

Revenue from Services

Revenue from services is recognized when the outcome of the transaction can be reliably measured. If the service delivery spans multiple periods, revenue is recognized in the period based on the proportion of service that has been completed by the date of preparing the balance sheet for that period. The outcome of the service transaction is determined when the following conditions are met:

- The revenue can be reliably measured.
- It is probable that economic benefits associated with the transaction will flow to the entity.
- The proportion of work completed by the date of the balance sheet can be determined.
- The costs incurred for the transaction and the costs to complete the transaction can be determined.

Revenue from Construction Contracts

Revenue from construction contracts is recognized when the outcome of the construction contract can be reliably measured and has been certified by the customer. Revenue and related expenses are recognized in proportion to the work completed during the period as reflected on the issued invoices.

Financial Operation Revenue

This includes revenue generated from bank deposit interest, dividends, and gains from foreign exchange differences. It is recorded based on the monthly bank interest notifications, dividend payment notices, and gains resulting from exchange rate changes related to foreign currency transactions.

# 14. Accounting Principle for Cost of Goods Sold

When recognizing revenue, a corresponding cost (cost of goods sold) associated with generating that revenue is also recognized simultaneously. This cost includes expenses incurred in the period that generated the revenue and costs from previous periods or accrued expenses related to the revenue of that period.

# 15. Principles and Methods for Recognizing Financial Expenses

Financial expenses include costs related to borrowing and interest expenses; losses arising from changes in exchange rates associated with foreign currency transactions. These amounts are recognized as incurred during the period and are not offset against financial operation revenue.

# 16. Accounting Principle for Administrative Expenses

Km35 - National Highway 10 - An Quang Commune - Hai Phong City

Administrative expenses reflect the total general expenses of the company such as: salaries and insurance for company management staff, depreciation of fixed assets used for business management, land rent, business license tax, provision for doubtful accounts, and outsourced services for the company's management.

# 17. Principles and Methods for Recognizing Current Corporate Income Tax Expenses

Current corporate income tax expenses are determined based on taxable income and the corporate income tax rate for the current year.

Other types of taxes are applied according to the current tax laws in Vietnam.

#### 18. Related Parties

Parties are considered related if one has the ability to control the other, or to significantly influence the related party either directly or indirectly through common control relationships or significant influence. Transactions with related parties are disclosed in the financial statements' notes.

#### VII. OTHER INFORMATION

#### 1. Commitments

Although Myanmar is currently politically unstable, the Board of Directors and the Executive Board of the company remain committed to adhering to the commitments stated in the published financial report. Specifically, according to the resolution of the annual general meeting of shareholders No. 01/NQ/2017/DHCD-AMECC dated April 2, 2017, the shareholders approved the plan and method of investing abroad in Myanmar by contributing capital to the joint venture company Amece - Myanmar Shipyards with a total investment of USD 42.073 million, now temporarily adjusted to USD 26.31 million according to document No. 50BS/PABS-AMECC dated March 25, 2019, from the General Director to the Board of Directors. Currently, the above investment plan is still in progress. The company is completing procedures to obtain an overseas investment certificate from the competent authority

#### 2. Events occurring after the end of the accounting period

There were no significant events occurring after the end of the accounting period that require adjustment or disclosure in the financial statements.
