- Warehousing and storage of goods;
- Loading and unloading of goods;
- Leasing of machinery, equipment and other tangible goods;
- Wholesale of solid, liquid, gaseous fuels and related products;
- Sauna, massage and similar health-enhancing services (except activities sport)/.

2. BASIS FOR PREPARING FINANCIAL STATEMENTS AND ACCOUNTING PERIOD

2.1 Basis for preparing Financial Statements

The accompanying financial statements are presented in Vietnamese Dong (VND), under the historical cost principle and in accordance with Vietnamese Accounting Standards, Vietnamese Accounting System and other current regulations on accounting in Vietnam.

2.2 Accounting period

The Company's annual accounting period begins on January 1 and ends on December 31 of the calendar year.

These financial statements are prepared for the financial period ending December 31, 2024.

3. MAIN ACCOUNTING POLICIES

The following are the main accounting policies applied by the Company in preparing the Financial Statements:

3.1 Accounting estimates

The preparation of the Financial Statements in accordance with Vietnamese Accounting Standards and the Vietnamese Accounting System requires the Board of Directors to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosure of contingent assets and liabilities at the date of the Financial Statements as well as the reported amounts of revenues and expenses during the financial period. Actual results may differ from the estimates and assumptions made.

3.2 Cash and cash equivalents

Cash and cash equivalents include cash on hand, bank deposits, cash in transit, deposits, short-term or highly liquid investments. Highly liquid investments are those that can be converted into known amounts of cash within 3 months and are subject to an insignificant risk of changes in value.

3.3 Receivables and provisions for doubtful debts

Provision for doubtful debts is established in accordance with Circular No. 228/2009/TT-BTC dated December 7, 2009 of the Ministry of Finance on guiding the regime of setting up and using provisions for inventory price reduction, loss of financial investments, bad debts and warranty of products, goods and construction works at enterprises. Accordingly, the Company is allowed to set up provisions for the lost value of overdue receivables and receivables that are not overdue but may be difficult to collect due to the debtor's inability to pay.

3.4 Inventory

Inventories are measured at the lower of cost and net realizable value. Cost includes direct materials, direct labor and those overheads (if any) that have been incurred in bringing the inventories to their present location and condition. Cost is determined using the weighted average method. Net realizable value is determined as the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**3.4 Inventory (Continued)**

For inventories, it is the cost of unfinished production and business, mainly unfinished construction projects whose revenue has not been determined. These unfinished production and business costs are collected on the basis of direct costs at the projects.

Inventory accounting method: by perpetual inventory method.

Provision for inventory price reduction is made in accordance with Circular No. 228/2009/TT-BTC dated December 7, 2009 of the Ministry of Finance. Accordingly, the Company is allowed to make provision for inventory price reduction for obsolete, damaged, or substandard inventory in cases where the actual value (original price) of the inventory is higher than the market price at the end of the accounting year.

3.5 Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation.

The original cost of tangible fixed assets includes the purchase price and all other costs directly attributable to bringing the fixed assets to working condition for use.

For fixed assets that have been put into use but have not yet had an official settlement, the original price of fixed assets will be temporarily recorded as an increase and depreciation will be deducted. When there is an official settlement, the original price and depreciation will be adjusted accordingly.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives. The specific depreciation periods are as follows:

Fixed assets group	Time of use (years)
Houses, buildings	6 - 25
Machinery and equipment	8
Means of transport, transmission	8
Equipment, management tools and other fixed assets	3

3.6 Investment property and depreciation

Investment real estate is real estate used by the Company for operating lease purposes.

Investment properties are stated at cost, at cost less accumulated depreciation.

Depreciation period is determined equivalent to fixed assets of the same type.

3.7 Accounting for investments in joint ventures and associates

The value of the Company's investments in joint ventures and associates is recorded and reflected at cost. Annual profits from joint ventures in which the Company has contributed capital are reflected in financial income. In case the joint ventures suffer losses, the Company will consider setting aside provisions for long-term financial investment depreciation in accordance with current regulations.

3.8 Long-term prepaid expenses

Long-term prepaid expenses consist mainly of the remaining value of tools and supplies that do not qualify as fixed assets and are assessed as being capable of providing future economic benefits with a useful life of more than one year. These costs are capitalized as long-term prepaid expenses and are allocated to production and business expenses over 2 years.

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**3.9 Revenue and expense recognition**

Revenue from sales of goods and provision of services is recognized when the outcome of the transaction of goods and services can be reliably determined and it is probable that the economic benefits from the transaction will flow to the Company. Revenue from sales of goods and provision of services is recognized when the goods have been delivered and ownership has been transferred to the buyer or the services have been performed for the customer and the buyer has accepted payment. In cases where the provision of services involves multiple accounting periods, revenue is determined based on the results of the work actually completed in the period.

Construction revenue is determined when the project is completed, settled, handed over to the customer and the customer accepts payment. For projects with many items and partially accepted, revenue is recorded for each completed item (or part of work) based on the volume acceptance report confirmed by the investor.

For completed projects or project items with A - B acceptance confirmation but not yet paid and the Company has not yet collected all related costs to ensure the matching principle, revenue has not been recorded.

The cost of construction works implemented during the period is applied by the Company according to the guidance in Notice No. 1378/TB/CTDS-TCKT dated December 4, 2009 of the Company. Accordingly, the total cost of construction works implemented is determined based on the ratio of revenue (cumulative) to the value of the works (excluding tax) including the entire completed work volume of the Company and subcontractors (paid) from the commencement date to the time of determining the cost of construction works multiplied by the accumulated unfinished production and business costs. The cost of construction works implemented during the period is the total cost of construction up to the time of this period minus the cost of construction works implemented up to the previous period.

Financial revenue includes annual profits (if any) from joint ventures and associates in which the Company contributes capital, and bank deposit interest recorded on an accrual basis, determined based on the balance of bank deposit accounts and interest rates applied to each period by the banks.

Production and business costs incurred and related to the formation of revenue during the period are collected according to actual and estimated accounting period.

3.10 Foreign currency

Transactions in foreign currencies are translated at the exchange rate on the date of the transaction. Exchange differences arising from these transactions are recognized in the Income Statement.

The balances of cash assets and receivables and payables denominated in foreign currencies at the balance sheet date are converted at the average interbank exchange rate announced by the State Bank of Vietnam on that date. Exchange rate differences arising from revaluation of these accounts are recorded in the business results of the year. Profits arising from revaluation of foreign currency receivables and cash denominated in foreign currencies are not used for distribution.

3.11 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets that necessarily take a substantial period of time to get ready for their intended use or sale are added to the cost of those assets (capitalization) until such time as the assets are substantially ready for their intended use or sale.

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**3.11 Borrowing costs (Continued)**

Income arising from temporary investment of loans is recorded as a reduction in the original cost of related assets.

All other borrowing costs are recognized in the Income Statement when incurred.

3.12 Taxes and amounts payable to the State

Input VAT is accounted for using the deduction method.

The Company's goods sold are mainly subject to an output VAT rate of 10%.

The corporate income tax rate applied under current regulations is 20%.

Other taxes are applied according to current tax laws in Vietnam.

Re: explanation of difference
Profit after tax of financial
statements Q1/2025

Nghe An, April 16, 2025

Dear: - State Securities Commission
 - Hanoi Stock Exchange

- Pursuant to the provisions of Article 14 of Circular 96/2020/TT-BTC of the Ministry of Finance "Guidelines for information disclosure on the stock market".
- Based on the audited financial report of the first quarter of 2025 and the actual situation of Hoang Mai Stone Joint Stock Company.

Hoang Mai Stone Joint Stock Company would like to explain the change in profit after tax in the financial report for the first quarter of 2025 compared to the previous year as follows:

STT	INDICATORS	2025	2024	DIFFERENCE
1	Company profit after tax	324,209,379	680,647,380	(-52%)

Reason:

- The company's after-tax profit target decreased by VND 356,438,001 million, equivalent to a decrease of 52% compared to the previous year due to the price slide of construction materials, so the profit from construction projects achieved a low profit ratio.

We commit that the above information is true and are fully responsible before the law for the content of the published information.

Respectfully report to your agency and investors./.

Recipient:

- As above;
- Board of Directors b/c
