The fourth Quarter of 2025

**4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

**Cash and cash equivalents**

Cash comprises cash on hand, bank deposits.

Cash equivalents comprise short-term deposits and highly liquid investments with an original maturity of less than 3 months that are readily convertible to known amounts of cash and that are subject to an insignificant risk of changes in value.

**Financial investments accounting principle**

*Held-to-Maturity investments accounting principle*

Held-to-Maturity investments include term deposits with banks.

Held-to-Maturity investments are initially stated at historical cost, which includes the purchase price and expenses associated with purchase of investments.

**Receivables**

The receivables comprise the customer receivables and other receivables. Receivables are recognized at the carrying amounts less allowances for doubtful debts.

Allowance for doubtful debts is assessed and made for overdue receivables that are difficult to be collected, or the debtor is unable to pay due to dissolution, bankruptcy or similar difficulties.

**Inventories**

Inventories are measured at the lower of cost and net realizable value. Cost of inventories comprise costs of direct materials, direct labor, and general operation (if any) incurred in bringing the inventories to their present location and conditions. The cost of inventories is determined in accordance with the weighted average method

Net realizable value is the estimated selling price of inventory items less all estimated costs of completion and costs of marketing, selling and distribution.

The Company's allowance for impairment of inventories is made when there is reliable evidence of impairment of the net realizable value compared to the history cost of inventories.

**Tangible fixed assets and Depreciation**

Tangible fixed assets are stated at history cost less accumulated depreciation. Historical costs of tangible fixed assets include all the expenses paid by the Company to bring the asset to its working condition for its intended use.

The original cost of self-made or self-constructed tangible fixed assets includes construction costs, actual production costs incurred plus installation and trial operation costs. Expenses incurred after initial recognition are only recorded as an increase in the original cost of fixed assets if these expenses certainly increase future economic benefits from the use of that asset. Expenses incurred that do not satisfy the above conditions are recorded as production and business expenses in the year.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives as follows:

	<u>Years</u>
Buildings, structures	06 - 30
Machinery and equipment	03 - 15
Motor vehicles	06 - 30
Office equipment	03 - 10
Others	04 - 05

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

The fourth Quarter of 2025

When a tangible fixed asset is sold or disposed, its historical cost and accumulated depreciation are written off, then any gain or loss arising from such disposal is included in the income or the expenses during the year

**Intangible fixed assets and Amortization**

The Company's intangible assets are Technology. Computer software is amortized on a straight-line basis over its estimated useful life of 2-3 years

Historical costs of intangible fixed assets include all the expenses paid by the Company to bring the asset to its working condition for its intended use.

**Prepaid expenses**

Prepaid expenses comprise actual expenses arising but relevant to financial performance in several accounting periods.

The Company's prepaid expenses includes interest and management fees, installation and replacement meter value, land rental costs, groundwater exploitation license application costs, etc.

Interest expenses and ADB project management fees incurred during the year are paid by the Company in January and June each year and are allocated equally for each 6-month period.

The value of installed and replaced meters is allocated equally by the Company within 12 quarters starting from the quarter of occurrence.

Land rental is allocated by the Company according to the rental period. Costs of preparing documents and granting licenses for underground water exploitation are allocated according to the licensed period. The remaining costs are allocated over 03 years using the straight-line method.

**Construction in progress**

Construction in progress reflects the Properties in progress for production, leasing, administrative purposes, or for any other purposes are recognized at the historical cost. This cost includes relevant service fees, interest fees in accordance with the Company's accounting policies. Depreciation of these assets is the same as the other assets, commencing from these assets are ready for their intended use.

**Payables**

The account payables are monitored in details by payable terms, payable parties, original currency and other factors depending on the Company's management requirement.

The account payables include payables as trade payables, loans payable, intercompany payable and other payables which are determined almost certainly about the recorded value and term, which is not carried less than amount to be paid. They are classified as follows:

- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company; and
- Costs related to transactions can be determined

***Revenue from selling clean water***

The revenue from selling clean water is determined and calculated based on the water tariff prescribed by the People's Committee of Binh Dinh Province (now the People's Committee of Gia Lai Province) and the monthly volume of water consumed, which is determined according to the water meter of the customers.

***Revenue of construction***

Revenues of construction are reliably recognized in the following cases:

For construction contracts stipulating that the contractor is paid according to the planned schedule, the revenue and expenses related to the contract are recognized in equivalent proportion to the completed work determined by the Company as at the balance sheet date.

For construction contracts stipulating that the contractor is paid according to the value of the volume performed, the revenue and expenses related to the contract are recognized in equivalent proportion to the completed work confirmed by the customer and reflected on the issued invoice

Increases and decreases in construction volume, compensation and other revenues are recognized as revenue only when agreed with the customer.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

The fourth Quarter of 2025

### 4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### **Revenue and other income (Continued)**

Revenues of construction are not recognized in the following cases:

- Revenue is recognized in equivalent proportion to contract costs which is probable to be paid.
- The contract costs are recognized to expenses only when they actually incur.

#### *Revenue from interest income and other income:*

The revenue is recognized when the Company can obtain economic benefits from the above activities and when it is reliably measured.

#### **Cost of goods sold**

Cost of goods sold or services rendered including the cost of clean water, production cost of construction products sold during the period is recorded corresponding to revenue of the period.

#### **Financial expenses**

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets that necessarily take a substantial period of time to get ready for their intended use or sale are capitalised as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Income arising from the temporary investment of borrowings is deducted from the cost of the relevant assets..

All other borrowing costs are recognized in the Income Statement when incurred.

#### **Current corporate income tax expense and deferred corporate income tax expense**

Current income tax expenses: are corporate income tax payable calculated on taxable profit during the year and current corporate income tax rate. Current income tax is calculated on taxable income and applicable tax rate during the tax period. Difference between taxable income and accounting profit is from adjustment of differences between accounting profit and taxable income in accordance with current tax policies.

The Company has an obligation to pay corporate income tax at the rate of 20% on taxable profits.

The determination of the Company's income tax is based on current tax regulations. However, these regulations change from time to time and the final determination of corporate income tax depends on the examination results of the competent tax authorities.

#### **Earnings per shares**

Basic earnings per shares are calculated by dividing net profit ( loss) after tax for the year attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year.

#### **Related parties**

A party is considered a related party of the Company in case that party is able to control the Company or to cause material effects on the financial decisions as well as the operations of the Company. A party is also considered a related party of the Corporation in case that party is under the same control or is subject to the same material effects.

When considering the relationship of related parties, the nature of relationship is focused more than its legal form.
