## 8. The Board of Management's responsibility in respect of the financial statements

The Board of Directors of the Company is responsible for preparing the financial statements that give a true and fair view of the financial position, business performance and cash flows of the Company during the period. In preparing the financial statements, the Board of Directors of the Company commits to comply with the following requirements:

- Establish and maintain an internal controls system which the Board of Directors and Management determines is necessary to ensure the preparation and presentation of the financial statements contain no material misstatements due to fraud or by mistake;
- Select suitable accounting policies and then apply them consistently;
- Make judgments and estimates that are reasonable and prudent;
- The applicable accounting standards are adhered to by the Company, with no material misapplication to the extent that disclosure and interpretation are required in these separate financial statements;
- Prepare the separate financial statements on going concern basis unless it is inappropriate to presume that the Company will continue its business.

The Board of Management is responsible for ensuring that proper accounting records are maintained which disclose, with reasonable accuracy at any time, the separate financial position of the Company to be prepared which comply with Vietnamese Accounting Standards, Vietnamese Accounting System for enterprises and the relevant statutory requirements applicable to financial reporting. The Board of Management is also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Board of Directors of the Company commits that the financial statements have fairly and fairly reflected the financial situation of the Company as at December 31, 2025, the business results and cash flows for the first 12 months of 2025, in accordance with Vietnamese accounting standards and regimes and comply with current relevant regulations.

#### Other commitments

The Board of Management ensures that the Company meets the prevailing requirements in the relation to disclosure of information, specifically the Circular No.96/2020/TT-BTC dated 16/11/2020 issued by the Ministry of Finance on guidelines for disclosure of information on the securities market.

Prepared, 12 January 2026

On behalf of the Board of Directors  
General Director

Tran Quoc Dung

Kien Hung Fishmeal Factory	Group 8, An Binh Hamlet, Binh An Commune, An Giang Province

### II. Accounting period, currency used in accounting

#### 1. Accounting period

The Company's fiscal year begins on January 1 and ends on December 31 of each year..

#### 2. Currency

The currency used in accounting records is Vietnamese Dong (VND).

### III. Accounting Standards and Regimes

#### 1. Accounting regime

The Company applies the Enterprise Accounting Regime issued under Circular No. 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance and guiding, supplementing and amending Circulars.

## **2. Declaration on compliance with Accounting Standards and Accounting Regime**

The Company has applied Vietnamese Accounting Standards and documents guiding the Standards issued by the State. Financial statements are prepared and presented in accordance with the provisions of the standards, circulars guiding the implementation of standards and the current Vietnamese Enterprise Accounting Regime in effect.

## **IV. Accounting policies applied**

### **1. Principles of recording cash and cash equivalents**

#### **a. Principles of recording cash amounts**

Cash is the total amount of cash available to the Company at the reporting date, including: cash in hand, non-term bank deposits and cash in transit.

#### **b. Principles of recording cash equivalents**

Cash equivalents are investments with a remaining recovery period of no more than 3 months from the reporting date that are easily convertible to a known amount of cash and are subject to no risk of conversion to cash since the date of purchase of the investment at the time of preparing the Financial Statements.

#### **c. Principles and methods of converting other currencies**

Economic transactions arising in foreign currency must be monitored in detail in the original currency and must be converted into Vietnamese Dong at the actual transaction exchange rate at the commercial bank where the enterprise regularly conducts transactions or the mobile weighted average exchange rate.

At the time of preparing the Financial Statements in accordance with the provisions of law, the Company re-evaluates the foreign currency and monetary gold balances according to the following principles:

-Actual transaction exchange rate when revaluing foreign currency items classified as assets: Is the foreign currency buying rate of the commercial bank where the enterprise regularly conducts transactions at the time of preparing the Financial Statement. For foreign currency deposits at the bank, the actual exchange rate when revaluing is the buying rate of the bank where the enterprise opens a foreign currency account;

- Actual transaction exchange rate when re-evaluating foreign currency items classified as liabilities: is the foreign currency selling rate of the commercial bank where the enterprise regularly conducts transactions at the time of preparing the Financial Statement.

## **2. Principles of recording financial investments**

Investments such as: Capital contributions to subsidiaries, joint ventures, associates, securities investments and other financial investments...

Classify investments when preparing Financial Statements according to the following principles:

- Investments with a remaining recovery period of no more than 12 months or within one business production cycle are classified as short-term.

- Investments with a remaining recovery period of 12 months or more or over one business production cycle are classified as long-term.

#### **a. Trading securities**

Is an investment in purchasing securities and other financial instruments for business purposes (holding with the aim of waiting for price increase to sell for profit). Business securities include:

"- Stocks and bonds listed on the stock market;

- Other types of securities and financial instruments such as commercial paper, forward contracts, swap contracts..."

Trading securities are recorded at cost. Trading securities are recorded at the time when the investor acquires ownership.

The dividend paid for the period before the investment date is recorded as a reduction in the value of the investment. When an investor receives additional shares without having to pay money because the joint stock company issues additional shares from the capital surplus, other funds belonging to the owner's equity or distributes dividends in shares, the investor only monitors the number of additional shares.

In case of stock exchange, the value of the shares must be determined according to the fair value on the exchange date.

When liquidating or selling trading securities, the cost price is determined by the moving weighted average method for each type of securities.

**Provision for devaluation of trading securities:** the portion of the value of the loss that may occur when there is solid evidence showing that the market value of the securities the Company is holding for business purposes has decreased compared to the book value. The provision or reversal of this provision is made at the time of preparing the Financial Statement and is recorded in the financial expenses of the period.

#### **b. Held-to-maturity investments**

This investment does not reflect bonds and debt instruments held for trading purposes with the aim of earning profit. Held-to-maturity investments include term deposits (remaining maturity of 3 months or more), treasury bills, promissory notes, bonds, preference shares that the issuer is required to redeem at a certain time in the future, loans held to maturity for the purpose of earning periodic interest and other investments held to maturity.

**Provision for financial investments:** investments held to maturity that are similar in nature to receivables that are unlikely to be collected should have a provision for doubtful debts set aside when preparing the financial statements. The setting aside or reversal of this provision is made at the time of preparing the financial statements and is recorded in the business management expenses of the period.

For investments held to maturity that have not been provided for doubtful debts in accordance with the law, the Company must assess the possibility of recovery. In cases where there is certain evidence that a part or the whole of the investment may not be recovered, the loss must be recorded in financial expenses for the period. In cases where the loss cannot be reliably determined, the investment is not recorded as a reduction and the recovery of the investment must be explained in the Notes to the Financial Statements.

#### **c. Investments in subsidiaries, joint ventures and associates**

Investments in subsidiaries and associates are accounted for using the cost method. Net profits distributed from subsidiaries and associates arising after the date of investment are recorded in financial revenue for the period. Other distributions (other than net profits) are considered as recovery of investments and are recorded as deductions from the cost of investment.

Joint venture activities in the form of jointly controlled business activities and jointly controlled assets are applied by the Company with general accounting principles as with other normal business activities. In which:

-The Company separately monitors income and expenses related to joint venture activities and allocates them to the parties in the joint venture according to the joint venture contract;

-The company separately tracks joint venture capital assets, capital contributions to jointly controlled assets, and common and separate debts arising from joint venture activities.

Expenses directly related to investment activities in joint ventures and associates are recorded as financial expenses in the period.

**Provision for investment losses in other entities:** losses due to subsidiaries, joint ventures, and associates making losses that may result in the investor losing capital or provisions due to the decline in the value of these investments. The provision or reversal of this provision is made at the time of preparing the Financial Statement for each investment and is recorded in financial expenses during the period.

#### d. Investments in equity instruments of other entities

Are investments in equity instruments of other entities but do not have control or joint control, do not have significant influence over the investee.

#### 3. Principles of recording receivables

Receivables are tracked in detail by receivable term, receivable entity, original currency and other factors according to the Company's management needs.

Classify receivables when preparing Financial Statements according to the following principles:

- Receivables with a remaining collection period of no more than 12 months or within one business production cycle are classified as short-term.
- Receivables with a remaining collection period of 12 months or more or over 1 business production cycle are classified as long-term.

At the time of preparing the Financial Statements in accordance with the law, the Company re-evaluates the balance of receivables in foreign currency (except for prepayments to sellers; if at the time of preparing the report there is solid evidence that the seller cannot provide goods and services and the Company will have to receive back the prepayments in foreign currency, these amounts are considered as foreign currency monetary items) at the foreign currency buying rate of the commercial bank where the Company regularly conducts transactions at the time of preparing the Financial Statements.

**Provision for bad debts:** bad debts are provisioned for bad debts when preparing the Financial Statements. The provisioning or reversal of this provision is made at the time of preparing the Financial Statements and is recorded in the business management expenses of the period. For bad debts that have lasted for many years and the Company has tried to use all measures to collect the debt but still cannot collect the debt and determines that the debtor is truly unable to pay, the Company may have to carry out procedures to sell the debt to a debt buying and selling company or write off the bad debts on the accounting books (implemented in accordance with the provisions of the Law and the Company's Charter).

#### 4. Principles of inventory recording

##### a. Principle of recognition

Inventories are stated at cost. Where the net realizable value is lower than the cost price, the net realizable value shall be used. The cost of inventories comprises purchase costs, processing costs and other directly attributable costs incurred in bringing the inventories to their present location and condition.

Assets purchased by the Company for production, use or sale are not presented as inventories on the Balance Sheet but are presented as long-term assets, including:

- Unfinished products have production and circulation time exceeding a normal business cycle;
- Materials, equipment, and spare parts with a storage period of more than 12 months or more than a normal production or business cycle.

#### **b. Method of calculating inventory value**

The value of ending inventory is determined by the weighted average method.

#### **c. Inventory accounting method**

Inventories are accounted for using the perpetual inventory method.

#### **d. Method of setting up inventory price reduction provision**

At the end of the accounting period, if the value of inventory is not fully recovered due to damage, obsolescence, reduced selling price or increased completion costs and selling costs, the Company shall establish a provision for inventory devaluation. The amount of the provision for inventory devaluation established is the difference between the original cost of inventory greater than their net realizable value.

### **5. Principles of recording and depreciating fixed assets, financial leased fixed assets, investment real estate**

Fixed assets are recorded at original cost. During use, fixed assets are monitored in detail for original cost, accumulated depreciation and residual value.

The cost of a finance leased asset is recorded at the fair value of the leased asset or the present value of the minimum lease payments (if the fair value is higher than the present value of the minimum lease payments) plus initial direct costs incurred in connection with the finance lease. If input VAT is deductible, the present value of the minimum lease payments does not include input VAT.

During use, the Company depreciates fixed assets into production and business expenses for fixed assets related to production and business. Intangible fixed assets such as land use rights are only depreciated for intangible fixed assets such as land use rights with a term.

Depreciation is calculated using the straight-line method. For machinery and equipment directly used in production, depreciation is calculated based on output. The depreciation period is estimated in accordance with the guidance in Circular No. 45/2013/TT-BTC dated April 25, 2013 and Circular No. 147/2016/TT-BTC dated October 13, 2016 of the Ministry of Finance. Specifically as follows:

	<u>Estimated years of depreciation</u>
- Houses and structures	05 - 50
- Means of transport	05 - 20
- Machinery and equipment	03 - 15
- Office equipment	03 - 06
- Perennial plant	02 - 08
- Other fixed assets	04 - 12
- Intangible fixed assets	36 - 49

### **6. Principles of recording business cooperation contracts**

A business cooperation contract (BCC) is a contractual agreement between parties to jointly carry out economic activities without forming an independent legal entity. The party receiving the assets contributed by the parties to the BCC activity accounts for this amount as a liability and is not recorded in equity. BCC has the following forms:

- BCC in the form of jointly controlled assets;
- BCC in the form of jointly controlled business activities;
- BCC in the form of sharing after-tax profits."

## 7. Principles of recording deferred corporate income tax

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability settled, based on tax rates that have been enacted at the balance sheet date.

## 8. Principles of recording prepaid expenses

Calculating and allocating prepaid expenses into production and business expenses for each accounting period is based on the nature and extent of each type of expense to select a reasonable and consistent method and criteria.

Prepaid expenses are tracked according to each prepayment period incurred, allocated to cost-bearing objects of each accounting period and the remaining amount not allocated to expenses.

Classify prepaid expenses when preparing Financial Statements according to the following principles:

- Amounts paid in advance to provide goods and services within a period not exceeding 12 months or a normal business production cycle from the time of prepayment are classified as short-term.
- Amounts paid in advance to provide goods and services for a period of more than 12 months or more than one normal business production cycle from the time of prepayment are classified as long-term.

## 9. Principles of recording payables

Payables are tracked in detail according to the remaining payment term of the payables, receivables, original currency of payables and other factors according to the Company's management needs.

Classify payables when preparing Financial Statements according to the following principles:

- Payables with a remaining payment period of no more than 12 months or within one business production cycle are classified as short-term.

- Payables with a remaining payment period of 12 months or more or over 1 business production cycle are classified as long-term.

At the time of preparing the Financial Statements in accordance with the law, the Company re-evaluates the balance of payables in foreign currencies (except for prepayments from buyers; if at the time of preparing the report there is solid evidence that the Company cannot provide goods and services and the Company will have to return prepayments in foreign currencies, these amounts are considered foreign currency monetary items) at the foreign currency selling rate of the commercial bank where the Company regularly conducts transactions at the time of preparing the Financial Statements.

## 10. Principles of recording loans and financial lease liabilities

Loans in the form of bond issuance or preferred stock issuance with a clause requiring the issuer to repurchase at a certain time in the future are not reflected in this item.

Loans and debts need to be monitored in detail for each subject, each contract and each type of debt asset. Financial lease liabilities are reflected at the present value of the minimum lease payments or the fair value of the leased asset.

Classify loans and financial lease liabilities when preparing Financial Statements according to the following principles:

- Loans and finance lease liabilities with a remaining repayment period of no more than 12 months are classified as short-term.

-Loans and finance lease liabilities with a remaining repayment period of more than 12 months are classified as long-term.

When preparing Financial Statements, the balance of loans and financial leases in foreign currencies must be evaluated at the actual transaction exchange rate at the time of preparing the Financial Statements.

Borrowing costs directly related to borrowing are recorded in financial expenses in the period, except for borrowing costs directly related to the construction or production of a qualifying asset, which are included in the cost of that asset (capitalized) when meeting all the conditions specified in the Accounting Standard "Borrowing costs".

### **11. Principles of recording payable expenses**

Payables for goods and services received from sellers or provided to buyers during the period but not actually paid due to lack of invoices or insufficient accounting records and documents, and payables to employees are recorded in production and business expenses during the period to ensure that when actual costs arise, they do not cause sudden changes in production and business expenses on the basis of ensuring the principle of matching between revenue and costs. The provision of payable costs must be calculated carefully and must have reasonable and reliable evidence. When such costs arise, if there is a difference with the amount already provided, the accountant will make an additional record or reduce the cost corresponding to the difference.

### **12. Principles for recording provisions for payables**

A provision is recognised when all of the following conditions are met:

- The Company has a present obligation (legal or constructive) as a result of a past event;
- It is probable that an outflow of resources embodying economic benefits will be required to settle the obligation;
- A reliable estimate can be made of the amount of the obligation."

The amount recognised as a provision is the best estimate of the expenditure required to settle the present obligation at the end of the reporting period.

A provision for corporate restructuring costs is only recognised when all the recognition conditions for provisions are met as prescribed in the Accounting Standard "Provisions, Contingent Assets and Liabilities".

Provisions for payables are set aside or reversed at the time of preparing the Financial Statements. Provisions for payables when set aside are recorded in business management expenses. In particular, provisions for payables for product and goods warranties are recorded in selling expenses; provisions for payables for construction warranty costs are recorded in general production expenses and reversed in other income.

Only expenses related to the originally established provision for payables are offset against that provision for payables.

### **13. Principles of recognizing unrealized revenue**

Unearned revenue includes revenue received in advance such as: the amount of money customers have paid in advance for one or more accounting periods for asset leasing; interest received in advance when lending capital or purchasing debt instruments; the difference between deferred or installment sales as committed compared to the cash price; revenue corresponding to goods, services or the amount of discounts for customers in traditional customer programs.

The balance of pre-received revenues in foreign currencies at the end of the accounting period, if there is no certain evidence that the Company will have to return the pre-received amount to customers in foreign currencies, is not assessed for exchange rate differences at the time of preparing the Financial Statements.

#### 14. Principle of equity recognition

##### a. Principles for recording owners' capital contributions, share capital surplus, convertible bond options, and other owners' capital

Owner's capital is recorded according to the actual capital contributed by the owner and is tracked in detail for each organization and individual contributing capital.

When the investment license stipulates that the company's charter capital is determined in foreign currency, the determination of the investor's capital contribution in foreign currency is based on the amount of foreign currency actually contributed.

Capital contribution in the form of assets is recorded as an increase in equity according to the revaluation value of the assets accepted by the capital contributors. For intangible assets such as brands, trademarks, trade names, exploitation rights, project development rights, etc., capital contribution can only be increased if permitted by relevant laws.

For joint stock companies, shareholders' equity is recorded at the actual price of shares issued, but is reflected in two separate indicators:

- Owner's equity is recorded at the par value of the shares;
- Share premium is recorded at the greater or smaller difference between the actual issue price of the shares and the par value."

In addition, capital surplus is also recorded as the larger or smaller difference between the actual issue price and the par value of shares when reissuing treasury shares.

The option to convert a bond issued with shares arises when a company issues a type of bond that can be converted into a specified number of shares as specified in the issuance plan. The value of the equity component of a convertible bond is the difference between the total amount received from the issuance of the convertible bond and the value of the debt component of the convertible bond. At the time of initial recognition, the value of the stock option of a convertible bond is recorded separately in the owner's equity. When the bond matures, the option is accounted for as equity surplus.

Other capital reflects business capital formed by supplementing business results or by being donated, presented, sponsored, or revaluation of assets (according to current regulations).

##### b. Principles of recording exchange rate differences

An exchange rate difference is the difference arising from the actual exchange or conversion of the same amount of foreign currency into the accounting currency at different exchange rates.

Exchange rate differences are reflected in financial revenue (if profit) or financial expenses (if loss) at the time of occurrence. In particular, exchange rate differences in the pre-operation period of enterprises in which the State holds 100% of charter capital and implements national key projects and works are reflected on the Balance Sheet and gradually allocated to financial revenue/expenses.

##### c. Principles for recording undistributed profits

Undistributed profit after tax is the profit from the company's operations after adding (+) or subtracting (-) adjustments due to retroactive application of changes in accounting policies and retroactive adjustment of material errors of previous years.

The Company's after-tax profit is distributed as dividends to shareholders after being approved by the Board of Shareholders at the Company's Annual General Meeting and after setting aside reserve funds in accordance with the Company's Charter.

The parent company shall distribute profits to owners not exceeding the undistributed profit after tax on the Consolidated Financial Statements after excluding the impact of profits recorded from bargain purchases. In case the undistributed profit after tax on the Consolidated Financial Statements is higher than the undistributed profit after tax on the separate Financial Statements of the parent company and if the amount of profit decided to be distributed exceeds the undistributed profit after tax on the separate Financial Statements, the parent company shall only make distribution after transferring profits from the subsidiaries to the parent company.

When distributing profits, it is necessary to consider non-cash items in undistributed profits after tax that may affect the company's cash flow and ability to pay dividends and profits.

## 15. Revenue recognition principles

### a. Principles of recording sales revenue

Revenue from sales is recognized when all of the following conditions are met:

- The significant risks and rewards of ownership of the goods have been transferred to the buyer;
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- The costs incurred or to be incurred in respect of the transaction can be measured reliably."

### b. Principles of recognizing service revenue

Revenue from the provision of services is recognized when all of the following conditions are met:

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the entity;
- The stage of completion of the transaction at the reporting date can be measured reliably;
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably."

### c. Principles of recording financial revenue

Financial revenue includes interest, royalties, dividends, profit sharing and other financial revenue. For interest from loans, deferred payment and installment sales: revenue is recorded when it is certain to be received and the loan principal and receivable principal are not classified as overdue requiring provisions. Dividend revenue is recorded when the right to receive dividends is established.

### d. Principles of recognizing other income

Other income includes income other than the company's production and business activities: sale and liquidation of fixed assets; fines due to customers' breach of contract; compensation from third parties to compensate for lost assets; revenue from bad debts that have been written off; debts payable with unidentified owners; income from gifts in cash or in kind...

## 16. Principles for recording revenue deductions

The adjustment to reduce revenue is made as follows:

- Adjust the revenue of the period in which it occurs if the revenue deductions arise in the same period of consumption of products, goods and services;"

- Adjust revenue reduction as follows if revenue deductions arise after the period of consumption of products, goods, and services:
  - + Adjust revenue reduction on the Financial Statement of the reporting period if revenue deductions arise before the time of issuance of the Financial Statement;
  - + Adjust revenue reduction on the Financial Statement of the period after the reporting period if revenue deductions arise after the time of issuance of the Financial Statement."

#### **17. Principles of recording cost of goods sold**

Cost of goods sold includes the capital value of products, goods, services, investment real estate; production cost of construction products sold during the period and expenses related to investment real estate business activities...

The value of inventory loss or damage is recorded in the cost of goods sold after deducting compensation (if any).

For direct material costs consumed in excess of normal levels, labor costs, and fixed general production costs, they are not allocated to the value of products in stock but are calculated into the cost of goods sold after deducting compensation (if any), even when the products and goods have not been determined to be consumed.

#### **18. Principles of recording financial expenses**

Financial expenses include financial operating expenses: expenses or losses related to financial investment activities; expenses for lending and borrowing capital; expenses for contributing capital to joint ventures and associations; losses on securities transfer; provisions for devaluation of trading securities; provisions for losses on investments in other entities; losses arising from selling foreign currencies, exchange rate losses...

#### **19. Principles of recording selling expenses and business management expenses**

Selling costs reflect actual costs incurred in the process of selling products, goods and providing services.

Business management costs reflect the general expenses of the company including expenses for salaries, social insurance, health insurance, unemployment insurance, union fees of management staff; costs of office materials, labor tools, depreciation of fixed assets used for company management; land rent, business license tax; provision for bad debts; outsourced services; other cash expenses...

#### **20. Principles for recording current corporate income tax expenses and deferred corporate income tax expenses**

Current corporate income tax expense is the amount of corporate income tax payable determined on the basis of taxable income and current corporate income tax rate.

Deferred corporate income tax expense is the amount of corporate income tax payable in the future arising from:

- Recognition of deferred income tax payable in the year;
- Reversal of deferred income tax assets recorded in previous years."

#### **21. Related parties**

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence.

In considering the relationship of related parties, more attention is paid to the substance of the relationship than to the legal form.

#### **22. Financial instruments**

Pursuant to Circular No. 75/2015/TT-BTC dated May 18, 2015 of the Ministry of Finance, before the Accounting Standards on Financial Instruments and guiding documents are issued, the Company's Board of Directors decided not to present and explain financial instruments according to Circular No. 210/2009/TT-BTC in the Company's financial statements.

*c. Financial lease liabilities**d. Overdue and unpaid loans and financial lease debts*Note:

(1) Credit contract No. 0003/25/HĐCTD-KH dated January 16, 2025; the term is 12 months; the granted limit is 15 billion VND or equivalent in foreign currency USD. The purpose is to finance legal, reasonable and valid short-term credit needs for the production and processing of fishmeal and frozen seafood. Loan interest rate is based on each debt receipt. All contracts are secured by land use rights, assets on land at the Frozen Factory, Kien Hung Fishmeal Factory and assets of third parties.

(2) Credit limit loan contract No. 25940019/2025-HĐCVHM/NHCT840-CT CP KIEN HUNG dated October 13, 2025, with a limit term until October 10, 2026. The granted limit is VND 150 billion. The purpose is to supplement working capital to serve the production and processing of frozen seafood and fishmeal. Interest rate is based on each disbursement. The loan is secured by goods of Kien Hung Joint Stock Company, and a third-party mortgage contract for land use rights and assets attached to the land.

(3) Credit contract No. 17670080/2017-HĐCVDADT/NHCT840-CT CP KIEN HUNG dated January 14, 2018. The loan amount does not exceed VND 120 billion. Loan term is 84 months. Loan purpose is to pay reasonable and valid costs to implement the Kien Hung Seafood Processing Factory project in Thanh Loc Industrial Park, Thanh Loc Commune, Chau Thanh District, Kien Giang Province. Secured by assets formed from loan capital.

(4) Credit limit agreement number: HDTD870202500431 dated November 20, 2025, with a limit term until November 19, 2026. The credit limit is VND 30 billion or the equivalent in USD. The purpose is to supplement working capital for the processing of fishmeal and other seafood products. The loan is secured by land use rights and construction works attached to the land, and a vehicle. Interest is charged per disbursement.

(5) Loan under Loan Agreement No. 01/HDVT-2024 dated July 31, 2024 with Mr. Le Van Cong to supplement investment capital. Loan term from July 31, 2024 to July 31, 2027, loan interest rate 10.5%/year. This loan is unsecured.

(6) Loan under Loan Agreement No. 02/HDVT-2024 dated July 31, 2024 with Ms. Trinh The Uyen to supplement investment capital. Loan term from July 31, 2024 to July 31, 2027, loan interest rate 10.5%/year. This loan has no collateral.
