EXPLANATORY NOTES ON FINANCIAL REPORT

I- CHARACTERISTICS OF THE ENTERPRISE'S OPERATIONS

PHU BAI SPINNING MILL JOINT STOCK COMPANY:

Phu Bai Spinning Mill Joint Stock Company was established according to Decision 1185/QĐ-HĐQT of the Board of Directors of Vietnam National Textile and Garment Group regarding the contribution of capital to Phu Bai Spinning Joint Stock Company and based on the Agreement dated December 24, 2002, between the founding shareholders. The company operates under Business Registration Certificate No. 3103000053 dated January 14, 2003, issued by the People's Committee of Thua Thien Hue Province, and has amended the business registration certificate for the joint-stock company under certificate number: 3300352720, dated December 24, 2010. Amended for the 11th time on January 04, 2025.

Investment Certificate No. 31321000019 April 27, 2009

No. 31321000019 June 1, 2009

Board of Directors:

Mr. Pham Van Tan	Chairman
Mr. Bui Thanh Hung	Member
Mrs. Le Thi Que Huong	Member
Mr. Tran Dinh Hiep	Member
Mr. Truong Van Hien	Member

Board of General Directors:

Mr. Tran Dinh Hiep	General Director
Mrs. Le Thi Que Huong	Deputy General Director
Mrs. Hoang Thai Truc	Deputy General Director

Registered Head Office: Phu Bai Industrial Zone, Phu Bai Ward, Huong Thuy Town, Hue City, Vietnam

Business Line/Activities:

- Spinning (spinning and trading of yarn, fabric weaving, raw materials, and products in the spinning, weaving, and dyeing industries)
- Wholesale of machinery, equipment, and other machine parts (electrical equipment, electrical system tools, and equipment for the spinning, weaving, and dyeing industries)
- Garment manufacturing (excluding fur clothing) (production and trading of ready-made clothing)

II- Basis for Preparing the Financial Statements

The accompanying financial statements are presented in Vietnamese Dong (VND), based on the historical cost principle and in accordance with the Vietnamese Accounting Standards, the Enterprise Accounting System issued under Decision No. 15/2006/QĐ-BTC dated March 20, 2006, by the Ministry of Finance, and other current accounting regulations and guidelines in Vietnam.

Accounting period:

The company's accounting period is from January 1st to December 31st of the calendar year.

III- SUMMARY OF MAIN ACCOUNTING POLICIES:

The following are the main accounting policies used by the Company in the preparation of this financial statement:

Accounting estimates :

The preparation of the financial statements complies with the Vietnamese Accounting Standards, the Vietnamese Accounting System, and relevant legal regulations.

IV- Statement of compliance with Vietnamese Accounting Standards and the Vietnamese Accounting System:

According to the Vietnamese Accounting Standards issued by the Ministry of Finance, effective as of December 31, 2006.

- Cash and cash equivalents :

Investments are recorded at their original cost. A provision for impairment is made when the market value of an investment decreases below its original cost or if the investee company incurs losses. The provision is reversed if the recoverable value increases later and can be objectively linked to an event occurring after the provision was recognized. The provision can only be reversed to the extent that the carrying amount of the investment does not exceed its carrying amount had no provision been recognized.

- Receivables :

Trade receivables and other receivables are recorded at their original cost less the provision for doubtful debts.

- Inventories :

Inventories are valued at the lower of cost and net realizable value. The cost of inventories includes purchase costs, processing costs, and other directly attributable costs incurred to bring the inventories to their current location and condition. The cost of goods sold and inventory is determined using the weighted average method. Inventories are accounted for using the perpetual inventory system.

- Provision for inventory impairment: Yes

- Property, plant, and equipment:

Property, plant, and equipment are presented at cost less accumulated depreciation.

Depreciation is calculated using the straight-line method based on the estimated useful life of the property, plant, and equipment. The estimated useful life is as follows:

Buildings and structures: 6 - 30 years

Machinery and factory equipment 50,000: 5 - 10 years

Machinery and factory equipment 30,000 (new): 10 - 15 years

Vehicles: 3 - 6 years

Office equipment: 3 - 5 years

- Intangible assets :

Computer software :

The purchase cost of new computer software, which is not an integral part of the related hardware, is capitalized. The computer software is depreciated using the straight-line method over a period of 3 years.

- Borrowing costs :

Borrowing costs are recognized as an expense in the year in which they are incurred.

- Taxes :

Corporate income tax reflects the total value of current tax payable and deferred tax.

Current tax payable is calculated based on taxable income for the year. Taxable income differs from net profit presented in the Income Statement because taxable income does not include income or expenses that are taxable or deductible in other years (including carried forward losses, if any) and also excludes non-taxable or non-deductible items.

Deferred income tax is calculated on the differences between the carrying amount and the tax base of assets or liabilities on the consolidated financial statements and is recognized using the balance sheet method. Deferred tax liabilities must be recognized for all temporary differences, while deferred tax assets are only recognized when it is probable that there will be sufficient taxable income in the future to offset the temporary differences.

Deferred income tax is determined based on the tax rate expected to apply in the year when the asset is recovered or the liability is settled. Deferred income tax is recognized in the consolidated income statement, except when the tax relates to items directly credited or debited to equity. In such cases, deferred tax is also recognized directly in equity.

The tax rate applied to fiber production activities:

- For the 30,000 spindle production line: The corporate income tax rate is 15% for 12 years starting from 2003, the year business operations began. Corporate income tax incentives: Exemption for 3 years: 2004, 2005, 2006, and a 50% reduction in the tax payable for 7 years: from 2007 to 2013.
- For the 20,000 spindle production line, which is an expansion investment project: The corporate income tax rate is 15%. Tax exemption for 1 year: 2006, and a 50% reduction in the tax payable for 4 years: from 2007 to 2010.
- For the investment in additional spinning equipment and other production facilities for the 50,000 spindle production line: No corporate income tax incentives are provided according to the provisions of Circular No. 130/2008/TT-BTC, dated December 26, 2008.
- For the new 30,240 spindle production line put into operation in 2021: The corporate income tax rate is 20%. Tax exemption for 2 years: 2021, 2022, and a 50% reduction in the tax payable for 4 years: from 2023 to 2026, according to Circular No. 78/2014/TT-BTC, dated June 18, 2014.

- Equity

The company's owner's equity consists of the capital contributions of both internal and external shareholders, recorded based on the actual capital contributed by shareholders, calculated according to the par value of the issued shares.

Share premium is the difference between the actual issuance price and the par value of the shares when additional shares are issued.

- Revenue recognition :

Revenue is recognized when the outcome of the transaction can be reliably measured, and the company is likely to receive the economic benefits from the transaction.

Sales revenue is recognized when goods are delivered and ownership is transferred to the buyer.

Revenue from service provision is recognized when there is evidence that the service has been completed at the end of the accounting period.

- Foreign currency :

During the year, transactions conducted in foreign currencies are converted to Vietnamese Dong at the actual exchange rate on the transaction date. The resulting foreign exchange gain (loss) is recognized in the financial income (expenses) for the period.

Assets in the form of cash and foreign currency liabilities are revalued at the buying rate of the commercial bank where the entity conducts transactions on the balance sheet date. The revaluation exchange rate differences are reflected in the Foreign Exchange Differences and the balance is transferred to financial expenses at the time of preparing the financial statements.

- Revenue recognition:

Revenue is recognized when the outcome of the transaction can be reliably measured, and the company is likely to receive the economic benefits from the transaction.

Sales revenue is recognized when goods are delivered and ownership is transferred to the buyer.

Revenue from service provision is recognized when there is evidence that the service has been completed at the end of the accounting period.

Revenue is recognized when the outcome of the transaction can be reliably measured, and the company is likely to receive the economic benefits from the transaction.

Sales revenue is recognized when goods are delivered and ownership is transferred to the buyer.

Revenue from service provision is recognized when there is evidence that the service has been completed by the end of the accounting period.
