Lot 04 Dien Nam Dien Ngoc Industrial Park, Dien Ngoc Ward, Dien Ban Town, Quang Nam Province

#### NOTES TO THE FINANCIAL STATEMENTS (Continued)

For the financial period ending March 31, 2025

The determination of the Company's income tax is based on current tax regulations. However, these regulations are subject to change from time to time and the final determination of corporate income tax depends on the results of the examination by the competent tax authority.

Deferred income tax is calculated on the differences between the carrying amount and the tax base of assets or liabilities in the Financial Statements and is recorded under the Balance Sheet method. Deferred income tax liabilities should be recognized for all temporary differences while deferred income tax assets are recognized only when it is probable that future taxable profits will be available against which the temporary differences can be used.

Deferred income tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is recorded in the Income Statement, except when it relates to items recorded directly in equity, in which case the deferred tax is also recorded in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Other taxes are applied according to current tax laws in Vietnam.

#### 18. Earnings per share

Basic earnings per share is calculated by dividing the profit after tax attributable to ordinary shareholders of the Company before appropriation of bonus and welfare funds by the weighted average number of ordinary shares outstanding during the year.

#### 19. Stakeholders

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence.

#### NOTES TO THE FINANCIAL STATEMENTS (Continued)

For the financial period ending March 31, 2025

The Company has not assessed the fair value of its financial assets and financial liabilities as at the balance sheet date because Circular 210/2009/TT-BTC dated 6 November 2009 and current regulations do not provide specific guidance on determining the fair value of financial assets and financial liabilities. Circular 210 requires the application of International Financial Statement Standards on the presentation of financial statements and disclosure of information for financial instruments but does not provide equivalent guidance for the measurement and recognition of financial instruments including the application of fair value to comply with International Financial Statement Standards.

#### Financial risk management objectives

The Company has established a risk management system to identify and assess the risks faced by the Company, and to establish policies and procedures to control risks at an acceptable level. The risk management system is reviewed periodically to reflect changes in market conditions and the Company's operations.

Financial risks include market risk (foreign currency risk (exchange rate risk). interest rate risk and price risk). credit risk and liquidity risk.

#### Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk includes three types: currency risk. interest rate risk and price risk.

The Company has no foreign currency risk due to its household appliances business. Domestic construction and mineral exploitation activities (Northern Region) are conducted in the accounting currency of VND.

#### Interest Rate Risk Management

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company is exposed to significant interest rate risk arising from its signed interest-bearing loans. The Company is exposed to interest rate risk when the Company borrows capital at floating and fixed interest rates. This risk will be managed by the Company by maintaining a reasonable level of fixed and floating interest rate loans.

# Managing stock price risk

Equity price risk is the risk that the fair value or future cash flows of an equity instrument will fluctuate due to changes in market prices other than changes in interest rates and foreign exchange rates.

# Stock price risk

Listed and unlisted stocks held by the Company may be affected by market risks arising from uncertainties about the future value of the investment stocks. The Company manages stock price risk by setting investment limits and diversifying its investment portfolio. The Board of Directors and the Board of Management of the Company also review and approve decisions on investment in stocks such as business lines. investment companies. etc. According to the current market situation. The Company assesses that the stock price risk is insignificant.

#### Credit risk

Credit risk is the risk that a party to a contract is unable to fulfill its obligations. resulting in a financial loss to the Company.

The Company is exposed to credit risks from its operating activities (primarily trade receivables) and financing activities (short-term equity investments. short-term loans. bank deposits. etc.).

#### Accounts receivable

The Company's current business activities are mainly divided into 3 main activities: commercial sector (buying and selling household appliances): mainly collect money immediately; construction and mineral

exploitation activities: The Company contracts construction and exploitation for external units. so the accounts receivable correspond to the payables to contractors and external exploitation units. with payment terms based on the progress of completed work. The Company believes that there is no significant credit risk for accounts receivable.

#### Short term loans

The Company lends and borrows money to individuals within 1 year with an interest rate of 8%/year. The Company assesses that these loans are all within term and not impaired because they are related to individuals with good reputation and payment ability..

#### Cash and cash equivalents

The majority of the Company's bank deposits are held at large, reputable banks in Vietnam. The Company considers the concentration of credit risk in bank deposits to be low.

# Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty and be unable to fulfill obligations related to financial liabilities.

The purpose of liquidity risk management is to ensure the availability of funds to meet present and future financial obligations. Liquidity is also managed by the Company to ensure that the excess of maturing liabilities over maturing assets in any period is kept to manageable levels relative to the amount of funds that the Company believes can be generated during that period. The Company's policy is to regularly monitor current and expected liquidity requirements to ensure that the Company maintains sufficient reserves of cash. borrowings and adequate committed capital from its owners to meet its liquidity requirements in the short and longer term.

The tables below detail the Company's remaining contractual maturities for its financial assets and non-derivative financial liabilities and their agreed repayment terms. The tables have been presented based on the undiscounted cash flows of financial assets and undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The presentation of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as liquidity is managed on a net asset and liability basis.
