### These factories have been inactive since 2012.

### 7. Total number of employees

Total number of employees as of June 30, 2025 is 10 people.

### II. ACCOUNTING PERIOD AND ACCOUNTING CURRENCY

### 1. Accounting period

Annual accounting period of Company is from 01 January to 31 December.

### 2. Accounting currency

The currency used in accounting records is Vietnamese Dong (VND).

### III. ACCOUNTING STANDARDS AND ACCOUNTING SYSTEM

### 1. Accounting system

The Company applies the Enterprise Accounting Regime issued under Circular No. 200/2014/TT/BTC dated December 22, 2014 of the Ministry of Finance and guiding, supplementing and amending Circulars.

### 2. Declaration of adherence to Accounting Standards and Accounting system

The Company applies Vietnamese Accounting Standards and supplement documents issued by the State. Financial statements are prepared in accordance with regulations of each standard and supplement documents as well as with current accounting system.

### IV. ACCOUNTING POLICIES

### 1. Principles of recognizing cash and cash equivalents

### a. Principles of recognizing cash

Cash includes: cash on hand, cash in bank under current account and cash in transit.

### b. Principles of recognizing cash equivalents

Cash equivalents are short term investments for a period not exceeding 3 months that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value from the date of purchase to the date of the Financial Statements.

### c. Principles and methods of converting other currencies

Transactions arising in foreign currencies are converted into Vietnam dong at the actual exchange rate at the time of transaction. Overdraft is recorded as a bank loan.

At the reporting date, the company is requested to revalue the balance of foreign currencies and monetary gold as below:

- The balance of foreign currencies: using buying price quoted by commercial bank which is trading with the company at the reporting date;

### 2. Principles of recognizing financial investment

Financial investment is the outside investments with purpose to use capital reasonably and improve efficiency of business operations such as investments in subsidiaries, joint ventures, cooperation, investment in securities and other financial investments ...

For the preparation of financial statements, the financial investment must be classified as below:

- Having maturity less than 12 months or 01 normal production period are recorded as short term.
- Having maturity over than 12 months or over 01 normal production period are recorded as long term.

### a. Held-to-maturity investments

This investment does not reflect bonds and debt instruments held for trading purposes with the aim of earning profit. Held-to-maturity investments include term deposits (remaining maturity of 3 months or more), treasury bills, promissory notes, bonds, preference shares that the issuer is required to redeem at a certain time in the future, loans held to maturity for the purpose of earning periodic interest and other investments held to maturity.

Provision for devaluation of investments held to maturity: for investments held to maturity that have not been provided for in accordance with the law, the Company must assess the possibility of recovery. In case there is certain evidence that a part or the whole of the investment may not be recoverable, the loss must be recorded in financial expenses in the period. The provision or reversal of this provision is made at the time of preparing the Financial Statement. In case the loss cannot be reliably determined, the investment is not recorded as a decrease and the recovery of the investment is explained in the Notes to the Financial Statements.

### b. Investments in subsidiaries, joint ventures and associates

Investments in subsidiaries and associates are stated at original cost. Distributions from accumulated net profits from subsidiaries and associates arising after the date of acquisition are recognized in the financial income. Other distributions (except net profits) are considered a recovery of investments and are deducted to the cost of the investment.

The Company applies accounting regulations on jointly controlled operations and jointly controlled assets as on normal business activities. In which:

- Monitoring incomes, expenses of joint ventures separately and allocated to parties of joint ventures;
- Monitoring contributed assets, contributed capital, liabilities separetely in the joint ventures arising from operating joint venture.

Expenses directly related to investment activities in joint ventures and associates have been recorded as financial expense in the period.

**Provision for investment losses in other units**: losses of subsidiaries, joint ventures, associates have led to loss of capital or provision of investors by declining value of investments. The provision is created or reverted at the reporting date for each investment and are recorded in financial expenses in the period.

### c. Investments in equity instruments of other entities

Investments in equity instruments of other entities but without control or joint control, without significant influence on the investee.

Investments in securities and other investments are recorded at cost. Provision for securities depreciation is made on the closing date. The cost of securities is determined by the weighted average method. When liquidating an investment, the difference between the net liquidation price and the book value is recorded in the business results of the period.

**Provision for investment losses in other entities:** the loss due to the unit in which the enterprise is investing in making a loss, leading to the possibility of the investor losing capital or the provision due to the decline in the value of these investments. The provision or reversal of this provision is made at the time of preparing the Financial Statement for each investment and is recorded in the financial expenses of the period.

### 3. Principles of recognizing trade and other receivables

All receivables must be recorded detail by aging, by each client and in original currency if any and others details depending on the management request of the company.

The classification of receivables must be managed as below:

- Trade receivables: any receivable having from trading activities between the company and its clients: selling goods, providing service, disposal of assets, exported receivable of consigner through the consignee;
- Intra-company receivables: receivables between the company with its dependent branches;
- Other receivables: are non trade receivables and do not related to trading activities.

For the preparation of financial statements, the receivables must be classified as below:

- Having maturity less than 12 months or 01 normal production period are recorded as short term.
- Having maturity over than 12 months or over 01 normal production period are recorded as long term.

At the reporting date, the company revaluates the receivables which have balance in foreign currency (except for advance to suppliers; if we have evidence that the supplier will not supply the good or provide the service and the company will receive back this advance in foreign currency, this advance will be treated as monetary item having foreign currency) at the buying price quoted by commercial bank which is trading with the company at the reporting date.

### 4. Principles of recognizing inventories

### a. Principles of recognizing

Inventories are stated at original cost. Where the net realizable value is lower than cost, inventories should be measured at the net realizable value. The cost of inventories should comprise all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

G TY
HÄN
HAT TRI

The assets are purchased for the production, use or sale are not presented in this item but are presented in item "Long-term equipment, supplies, spare parts", including:

- Work-in-progress products that have a production or turnover period of more than 12 months or more than an ordinary cycle of business operation;
- Supplies, equipments and spare parts for replacement which reserved period are more than 12 months or more than an ordinary cycle of business operation.

### b. Cost determination of inventories

Cost of inventories are determined in accordance with method: weighted average.

### c. Record method of inventories

Inventories are recorded in line with perpetual method.

### d. Method of provisions for decline in value of inventories

At the end of the accounting year, if the value of inventories cannot be recovered sufficiently due to damage, obsolescence, reduced selling prices or an increase in the estimated costs to complete or make them ready for sale, the Company shall prepare provision for devaluation of inventory. An allowance for devaluation of inventories is made as the difference between the cost of inventories and their net realizable value.

### 5. Principles of recording and depreciating fixed assets

Tangible fixed assets are recorded at historical cost less accumulated depreciation. The historical cost of a fixed asset comprises its purchase price and any costs directly attributable to bringing the asset to its working condition for its intended use. Expenditures incurred subsequent to initial recognition are recognized as additional costs of a fixed asset only if it is probable that they will result in future economic benefits from the use of the asset. Expenditures that do not satisfy the above criteria are recognized as expenses in the period.

During use, the Company depreciates fixed assets into production and business expenses for fixed assets related to production and business. Intangible fixed assets such as land use rights are only depreciated for intangible fixed assets such as land use rights with a term.

Depreciation is provided on a straight-line basis. The useful life are estimated as follows:

| - Buildings, plants                       | 18   | years |
|---|------|-------|
| - Machinery, equipments                   | 03 - | years |
| - Transportation equipments, transmitters | 6,00 | years |
| - Management equipment and tools          | 03 - | years |

### 6. Principles of recognizing prepaid expenses

The calculation and allocation of expenses to each accounting period is based on the nature and level of each prepaid expense.

Prepaid expenses are recorded separately: incurred, allocated amount to its cost center and carried amount.

Prepaid expenses are classified as follows:

- Prepaid expenses related to purchases or services less than 12 months or 01 normal production period, from incurred date, are recorded as short term.
- Prepaid expenses related to purchases or services over than 12 months or over 01 normal production period, from incurred date, are recorded as long term.

### 7. Principles of recognizing trade and other payables

All receivables must be recorded detail by aging, by each client and in original currency if any and others details, as deemed required by the management.

The classification of receivables must be managed as below:

- Trade receivables: receivables from trade-related activities between the company and its clients: selling goods, providing service, disposal of assets, exported receivable of consigner through the consignee;
- Intra-company receivables: receivables between the company with its dependent branches;
- Other receivables: non-trade related activities.

For the preparation of financial statements, the receivables must be classified as below:

- Having maturity over than 12 months or 01 normal production period are recorded as long - term.

At the reporting date, the Company revaluates the payables which have balance in foreign currency (except for advance from clients; if we have evidence that the supplier will not supply the good or provide the service and the company will receive back this advance in foreign currency, this advance will be treated as monetary item having foreign currency) at the selling price quoted by commercial bank which is trading with the Company at the reporting date.

### 8. Principles of recognizing loans and finance lease liabilities

Loans in the form of issuance of bond or preference share with preferential terms required the issuer to repurchase at a certain time in the future shall not be reflected on this item.

Loans, debts should be monitored in detail for each entity, each contract and each type of loan assets. The financial lease liabilities are stated at present value of minimum lease payment or the fair value of the lease assets.

For the preparation of financial statements, the loans and finance lease liabilities must be classified as below:

- Having maturity less than 12 months or 01 normal production period are recorded as short term.
- Having maturity over than 12 months or 01 normal production period are recorded as long term.

At the time of preparing the Financial Statements in accordance with the provisions of law, the Company re-evaluates the balance of loans and financial leases in foreign currencies at the foreign currency selling rate of the commercial bank where the Company regularly conducts transactions at the time of preparing the Financial Statements.

### 9. Principles of recognizing borrowings and capitalization borrowing costs

Borrowing costs are recognized into financial expenses, except in case where the borrowings cost directly attribute to the acquisition or work in progress is calculated to value of assets (capitalized), when all the conditions are in accordance with VAS "Borrowing costs".

### 10. Principle of recording payable expenses

Payables for goods and services received from sellers or provided to buyers during the period but not actually paid due to lack of invoices or insufficient accounting records and documents, and payables to employees are recorded in production and business expenses during the period to ensure that when actual costs arise, they do not cause sudden changes in production and business expenses on the basis of ensuring the principle of matching between revenue and costs. The provision of payable costs must be calculated carefully and must have reasonable and reliable evidence. When such costs arise, if there is a difference with the amount already provided, the accountant will make an additional record or reduce the cost corresponding to the difference.

### 11. Principles of recognizing capital

### a. Principles of recognizing contributed capital, capital surplus, conversion options on convertible bonds, other capital

Capital contribution is stated at actually contributed capital of owners and recorded by each individual, organization.

When capital of the investment license is determined in foreign currency, the determination of the investors shall be based on the actual amount of foreign currencies which they contribute.

Contributed capital in assets must be recorded in revaluation of assets which share holders approved. Intangible assets such as brand, trademark, trade name, right of exploitation, development projects ... shall only be recorded as capital if relevant law allows.

For joint-stock company, contributed capital of the shareholders is recorded according to actual price of stock issuance, but it is reflected in two separate items:

- Contributions from owners are recorded at par value of the shares;
- Capital surplus is recognized by the greater than or less than difference between the actual price of issue of shares and par value.

C.C.P \* HWW

NO CO

In addition, the capital surplus was also recorded at the difference higher or lower between the actual price of stock issuance and the par value of shares as treasury shares.

### b. Principles for recording undistributed profits

Undistributed earnings is the profit of business operations after addition (+) or deduction (-) of regulated items due to applying a change in accounting treatment retrospectively or to make a retrospective restatement to correct materiality in the previous year.

Profit distribution must be complied with the current financial policies.

When distributing profits, it is necessary to consider non-cash items in undistributed profits after tax that may affect the company's cash flow and ability to pay dividends and profits.

### 12. Principles of recognizing revenues

### a. Principles of recognizing revenue from sale of goods

Revenue from sale of goods should be recognised when all the following conditions have been satisfied:

- The significant risks and rewards of ownership of the goods have been transferred to the buyer;
- The Company retains neither continuing managerial involvement as a neither owner nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- The economic benefits associated with the transaction of goods sold have flown or will flow to the Company;
- The costs incurred or to be incurred in respect of the transaction of goods sold can be measured reliably.

When the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the reporting date, measured as the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs, unless this would not be representative of the stage of completion. Contract variations, claims and other payments are included in revenue only when agreed with the customer.

When the outcome of a construction contract cannot be estimated reliably, revenue is recognised only to the extent of contract costs incurred that it is probable will be recovered. Contract costs are recognised as expenses in the period in which they are incurred.

The difference between the cumulative total revenue of a construction contract recognized up to the reporting date and the cumulative amount recorded on the progress payment invoice up to the same date is recorded in the construction contract progress payment receivable/payable on the balance sheet.

### b. Principles of recognizing revenue from rendering of services

Revenue from rendering of services should be recognised when all the following conditions have been satisfied:

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- Identify the work completed at the date of the Report;
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

### c. Principles of recognizing financial income

Financial income includes interest, gain on exchange rate difference, dividends and other income related to financial activities. For interest earned from loans, deferred payment and installments: income is recognized when earned and the principal is not classified as overdue that need provision. Dividend is recognized when the right to receive dividend is established.

### d. Principles of recognizing other income

Other income includes income from other activities: disposal of asset; penalty receipt, compensation, collection of bad debt which has been written off, unknown payables and gifts in cash or non cash form.

### 13. Principles of recognizing costs of goods sold

Cost of goods sold includes cost of finished goods, trade goods, services, property, construction unit sold in the production period and expense related to real estate activities...

Damaged or lost value is allowed to record to cost of goods sold after deduction of compensation (if any). For the used material over the normal production capacity, labor and general production cost is not allowed to record to production cost but allowed to record to cost of goods sold after deduction of compensation (if any), even these finished goods are not sold.

### 14. Principles of recognizing financial expenses

Items recorded as financial expenses includes: expense or losses related to financial investments; lending and borrowing expense; expense related to investment in joint venture, associates; loss from share transfer; provision of share reduction or investment and loss on trading foreign currency.

### 15. Principles of recognizing selling and general administration expenses

Selling expense is recorded in the period of selling finished goods, trade goods and providing service.

Administrative expense reflects the general expense of the company, including: labor cost; social and health insurance, unemployment fund, union cost of management employee; office material expense, tools, depreciation of assets using for management; land rental, business licence tax; bad debt provision; outsourcing expense and other cash expenses.

### 16. Principles of recognizing current and defferred corporate income tax expense

Current corporate income tax expense is calculated based on taxable profit and income tax rate applied in the current year.

Deferred corporate income tax expense is the corporate income tax will be paid in future resulted from:

- Record of deferred tax payable during the year;
- Revert of deferred tax assets was recorded in previous years.

### 17. Relevant parties

Parties are considered related to the Company if the Company has the ability, directly or indirectly, to control or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Company and the party are subjected to common control or common significant influence.

In the review of related parties, nature of the relationship is considered more than legal form.

### 18. Financial instruments

Pursuant to Circular No. 75/2015/TT-BTC dated May 18, 2015 of the Ministry of Finance, before the Accounting Standards on Financial Instruments and guiding documents are issued, the Company's Board of Directors decided not to present and explain financial instruments according to Circular No. 210/2009/TT-BTC in the Company's Financial Statements.

### Note:

- (1) Project "Investoo Green city" or "Hung Long 1" in functional area No. 07, New Urban Area Nam Thanh City, Binh Hung commune, Binh Chanh district. Area 125,599.6 m2 invested by the company. The project has completed compensation work and the Company is carrying out the next legal procedures for the project.
- (\*) According to the Minutes of the Extraordinary General Meeting of Shareholders No. 01/11/2022/BBH-DHDCD dated November 3, 2022, approving the liquidation and termination of the Deposit Contract dated July 28, 2015 and the attached Appendices (referred to as the "Deposit Contract") according to the Submission No. 01/10/2022/TTr-HDQT dated October 3, 2022.
- The reason for the termination and liquidation of the Deposit Contract is that the Investment Law 2020 issued after the time the parties signed the Contract changed the legal provisions on the procedures for Approval of investment policy and recognition of project investors, resulting in the Parties being unable to implement Clause 3.6 Article 3 of the Deposit Contract.
- According to the Agreement on liquidation and termination of the contract dated January 16, 2023, the parties agreed on the compensation value The contract for VREMAX (approximately 1.5 times VREMAX Contribution) is VND 1,274,374,231,000.
