REPORT OF THE EXECUTIVE BOARD (continued)

THE BOARD OF EXECUTIVE OF RESPONSIBILITY

The Board of Executive is responsible for preparing the Financial Statements that accurately and reasonably reflect the Company's financial position, business performance, and cash flow situation for the year. In the preparation of this Financial Statements, the Board of Executive of the Company is required to:

- Select appropriate accounting policies and then apply these policies consistently;
- Make judgments and estimates that are reasonable and prudent;
- Clearly state whether the appropriate accounting principles are complied with or not, and whether there are any material misapplications that need to be disclosed and explained in the financial statements.
- Prepare financial statements on a going concern basis, except in cases where it cannot be assumed that the Company will
 continue its business operations, and
- Design and implement an effective internal control system for the purpose of preparing and presenting reasonable financial statements to limit risks and fraud.

The Board of Executive commits to complying with the above requirements in the preparation of the Financial Statements.

Thaiholdings Joint Stock Company

210 Tran Quang Khai street, Trang Tien ward, Hoan Kiem district, Hanoi

The Board of Executive ensures that the relevant accounting books are fully maintained to reflect the Company's financial situation and operational status with reasonable accuracy at any given time, and that the accounting books and financial statements are prepared in accordance with Vietnamese Accounting Standards, the current Vietnamese Enterprise Accounting Regime, and other current accounting regulations. The Board of Executive is also responsible for managing the Company's assets and has therefore implemented appropriate measures to prevent and detect fraudulent activities and comply with legal regulations related to the preparation and presentation of Financial Statements.

The Board of Executive of the Company commits that the Financial Statements reflected a true and fair view of the Company's financial position as of March 31, 2025, the results of operations, and the cash flow for the financial year ending on the same date, in accordance with accounting standards, the Vietnamese enterprise accounting regime, and compliance with legal regulations related to the preparation and presentation of financial statements.

The Board of Executive commits that the Company has not violated the information disclosure obligations as stipulated in Circular No. 96/2020/TT-BTC dated November 16, 2020, of the Ministry of Finance on guiding information disclosure on the Stock Market, Decree No. 155/2020/ND-CP dated December 31, 2020, of the Government detailing the implementation of several provisions of the Securities Law, and Circular No. 116/2020/TT-BTC dated December 31, 2020, of the Ministry of Finance guiding several provisios on corporate governance applicable to public companies under Decree No. 155/2020/ND-CP.

3 . SUMMARY OF MAIN ACCOUNTING POLICIES (Continued)

Accounting estimate

The preparation of financial statements in accordance with accounting standards, the Vietnamese enterprise accounting regime, and legal regulations related to the preparation and presentation of financial statements requires the Board of Directors to make estimates and assumptions that affect reported figures for debts, assets, and the presentation of potential debts and assets as of the date of the financial statements, as well as reported figures for revenue and expenses throughout the accounting period. Although the accounting estimates are made with the best understanding of the Board of Directors, actual results may differ from the estimates and assumptions made.

Cash and cash equivalents

Cash and cash equivalents include cash on hand, bank deposits, cash in transit, short-term investments, or high-liquidity investments. Highly liquid assets are those that can be converted into a specific amount of cash within a period not exceeding 3 months and have low risk related to fluctuations in the value of their conversion.

Investments in subsidiaries, joint ventures, investments in associated companies

Investments in associates

An associate company is a company in which the Company has significant influence but is neither a subsidiary nor a joint venture of the Company. Significant influence is reflected in the right to participate in making decisions about the financial and operational policies of the investee but does not include control or joint control over these policies.

The company initially recognizes the investment in the associate company at cost. The company records the share of profit from the cumulative net profit of the investee arising after the investment date as income in the income statement. Other amounts that the Company receives besides the distributed profits are considered as part of the recovery of investments and are recorded as a reduction in the original investment cost.

Provision for loss of investments in Associate Companies is made when there is solid evidence that there is a decline in the value of these investments at the end of the accounting period. The level of appropriation is equal to the difference between the actual capital contribution of the parties at the associate company and the actual equity multiplied by the ratio of the Company's capital contribution to the total actual capital contribution of the parties at the associate company

Increases and decreases in loss provisions for subsidiaries that need to be appropriated at the end of the fiscal year are recorded in financial expenses.

Investing in the equity instruments of another entity

Investment in equity instruments of another entity reflects an investment in equity instruments, but the Company does not have control, joint control, or significant influence over the investee.

Investment in equity instruments of other units is reflected at cost less provisions for impairment losses.

Business cooperation contract

A Business Cooperation Contract (BCC) is a contractual agreement between two or more parties to jointly conduct economic activities without forming an independent legal entity. The joint venture parties have obligations and enjoy benefits as agreed in the contract. The activities of the joint venture contract are carried out by the contributing parties alongside the other regular business activities of each party.

NOTES TO THE FINANCIAL STATEMENTS

These notes are an integral part and should be read in conjunction with the accompanying financial statements.

3 . SUMMARY OF MAIN ACCOUNTING POLICIES (Continued)

Provision for losses on investments in equity instruments of other entities is made as follows:

For investments in listed stocks or where the fair value of the investment is reliably determined, provisions are based on the market value of the stocks.

For investments whose fair value cannot be determined at the reporting date, the provision is made based on the loss of the investee, with the provision amount being the difference between the actual contributions of the parties at other entities and the actual equity multiplied by the Company's contribution ratio compared to the total actual contributions of the parties at other entities.

Accounts receivable and provisions for doubtful debts

Receivables are presented at book value less provisions for doubtful debts

The classification of receivables is carried out according to the following principle:

Accounts receivable from customers reflect trade receivables arising from purchase and sale transactions between the Company and buyers who are independent entities.

Other receivables reflect amounts receivable that are non-commercial and not related to buying and selling transactions.

The company sets up a provision for doubtful debts for receivables that are overdue for more than six months, or for receivables that the debtor is unlikely to pay due to liquidation, bankruptcy, or similar difficulties.

Inventory

Inventory is determined based on the lower of the cost and the net realizable value. The cost of inventory includes direct material costs, direct labor costs, and manufacturing overhead costs, if any, to acquire the inventory at its current location and condition. The inventory cost is calculated using the specific identification method. The net realizable value is determined by the estimated selling price minus the estimated costs to complete the product, along with the marketing, selling, and distribution costs incurred.

The inventory write-down provision of the Company is established according to current accounting regulations. Accordingly, the Company is permitted to set up provisions for the decline in value of obsolete, damaged, and substandard inventory, and in cases where the original cost of the inventory exceeds the net realizable value at the end of the fiscal year

Tangible fixed assets and depreciation

Fixed assets are reflected at original cost and accumulated depreciation.

The recognition of tangible fixed assets and the depreciation of fixed assets are carried out according to Vietnamese Accounting Standard No. 03 - Tangible Fixed Assets, Circular No. 200/2014/TT-BTC dated December 22, 2014, of the Ministry of Finance guiding the enterprise accounting regime, Circular No. 45/2013/TT-BTC dated April 25, 2013, of the Ministry of Finance guiding the regime for management, use, and depreciation of fixed assets, and Circular No. 147/2016/TT-BTC dated October 13, 2016, amending and supplementing some articles of Circular No. 45/2013/TT-BTC and Circular No. 28/2017/TT-BTC dated April 12, 2017, on amending and supplementing some articles of Circular No. 45/2013/TT-BTC and Circular No. 147/2016/TT-BTC of the Ministry of Finance.

The original cost of purchased tangible fixed assets includes the purchase price and all costs directly related to making the asset ready for use.

The original cost of fixed assets constructed by contractors includes the value of completed and handed-over works, directly related expenses, and registration fees.

210 Tran Quang Khai street, Trang Tien ward, Hoan Kiem district, Hanoi

NOTES TO THE FINANCIAL STATEMENTS

These notes are an integral part and should be read in conjunction with the accompanying financial statements.

3 . SUMMARY OF MAIN ACCOUNTING POLICIES (Continued)

Tangible fixed assets and depreciation (Continued)

The original cost of self-constructed or self-manufactured tangible fixed assets includes the actual cost of the self-constructed or self-manufactured tangible fixed assets and the installation and trial operation costs.

Tangible fixed assets are depreciated using the straight-line method based on the useful life of the asset, as follows:

	Number of depreciation years
Houses, architectural structures	20
Machinery and equipment	10
Transportation, vehicles	10
Management device	05
Other fixed assets	04 - 05

Intangible fixed assets and depreciation

Fixed assets are reflected at cost and accumulated depreciation. These are management software programs, depreciated over an estimated useful life of 10 years.

Prepaid expenses

Prepaid expenses include actual costs incurred but related to the operating results of multiple accounting periods. The prepaid expenses of the Company include the following expenses:

Land rental fee: Represents the amount of rent that has been paid in advance for the entire rental period 609.9 square meters of residential land at 2B Le Phung Hieu, Hoan Kiem, Hanoi according to the investment cooperation contract between the Company and the Joint Stock Company of Trade and Services with a total value of 29,700,000,000 VND. The contract is effective until the end of the land lease term of the lessor from September 12, 2014, unless terminated in accordance with the law. The company is currently allocating land lease payments over a period of 20 years. Prepaid rent is allocated to the income statement using the straight-line method over the lease term.

Other prepaid expenses: Including the value of tools and equipment awaiting allocation, fixed asset repair costs, office renovation costs, and other expenses, which are considered to have the potential to bring economic benefits to the Company in the future. These costs are capitalized in the form of prepaid expenses and allocated to the income statement using the straight-line method in accordance with current regulations.

Prepaid operating lease expenses: Including office rent, building service fees paid in advance for subleasing and allocated to the income statement over the lease term.

Leased assets

All leases are considered operating leases when the lessor retains most of the benefits and bears the risks of ownership of the asset. Operating lease expenses are recognized in the Income Statement using the straight-line method over the lease term. Amounts received or receivable to facilitate the signing of operating lease contracts are also recognized on a straight-line basis over the lease term.

NOTES TO THE FINANCIAL STATEMENTS

These notes are an integral part and should be read in conjunction with the accompanying financial statements.

3 . SUMMARY OF MAIN ACCOUNTING POLICIES (Continued)

Liabilities and accrued expenses

Liabilities and accrued expenses are recognized for the amount payable in the future related to goods and services received. Accrued expenses are recognized based on reasonable estimates of the amount payable.

The classification of payables as accounts payable, accrued expenses, and other payables is carried out according to the following principles:

- Accounts payable to suppliers reflect trade payables arising from transactions involving the purchase of goods, services, and assets, and the supplier is an independent entity from the Business, including payables when importing through an agent.
- Accrued expenses reflect amounts payable for goods and services received from sellers or provided to buyers but
 not yet paid due to the absence of invoices or insufficient accounting records and documents, as well as amounts
 payable to employees for vacation wages and production and business expenses that need to be accrued in
 advance.
- Other payables reflect non-commercial payables, unrelated to the purchase, sale, or provision of goods and services.

Equity

Owner's equity: The owner's contributions are recorded according to the actual capital contributed by the shareholders.

Profit distribution

The after-tax corporate income profit is distributed to shareholders after allocating funds according to the Company's Charter as well as legal regulations and has been approved by the General Meeting of Shareholders.

The distribution of profits to shareholders takes into account non-cash items within the undistributed after-tax profit that may affect cash flow and the ability to pay dividends, such as profits from the revaluation of contributed assets, profits from the revaluation of monetary items, financial instruments, and other non-cash items.

Dividends are recognized as a liability when approved by the General Meeting of Shareholders.

Recognize revenue

Sales revenue is recognized when all five (5) of the following conditions are simultaneously met:

- The company has transferred most of the risks and benefits associated with the ownership of the product or goods to the buyer.
- The company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods.
- Revenue is determined to be relatively certain;
- The company will gain economic benefits from the sales transaction; and
- Identify the costs related to the sales transaction.

The revenue from service provision transactions is recognized when the outcome of that transaction can be reliably determined. In cases where the service provision transaction extends multiple periods, revenue is recognized in the period based on the results of the work completed as of the balance sheet date of that period. The result of the service provision transaction is determined when all four (4) of the following conditions are met:

- Revenue is determined to be relatively certain;
- There is a possibility of obtaining economic benefits from the transaction providing that service.
- Determine the portion of work completed as of the date of the Balance Sheet; and

NOTES TO THE FINANCIAL STATEMENTS

These notes are an integral part and should be read in conjunction with the accompanying financial statements.

3 . SUMMARY OF MAIN ACCOUNTING POLICIES (Continued)

Recognize revenue (Continued)

- Determine the costs incurred for the transaction and the costs to complete the service provision transaction.

Income from capital transfer is determined as the difference between the selling price and the cost price of the investment. This income is recognized on the transaction date, that is, when the transfer contract is executed.

Interest on deposits is recognized on an accrual basis, determined based on the balance of deposit accounts and the applicable interest rate.

Interest from investments is recognized when the Company has the right to receive the interest.

Foreign currency

Transactions conducted in foreign currency are converted at the exchange rate on the date the transaction occurs. The balances of monetary items denominated in foreign currencies at the end of the fiscal year are converted at the exchange rate on that date. The arising exchange rate differences are recorded in the Income Statement. Exchange rate differences from re-evaluating balances at the end of the fiscal year are not to be distributed to the owners.

Borrowing costs

Borrowing costs are recognized as production and business expenses in the year they arise, unless they are capitalized according to the provisions of Vietnamese Accounting Standard No. 16 "Borrowing Costs." Accordingly, borrowing costs directly related to the purchase, construction, or production of assets that require a relatively long time to complete and put into use or operation are added to the asset's original cost until the asset is put into use or operation. Income arising from the temporary investment of loans is deducted from the original value of the related assets. For loans specifically for the construction of fixed assets and investment properties, interest on the loans is capitalized even if the construction period is less than 12 months.

Tax

Corporate income tax reflects the total value of the current tax payable. The current tax payable is calculated based on the taxable income for the year and the current income tax rate.

The current corporate income tax expense is calculated based on taxable income for the period. Taxable income differs from net profit presented in the Income Statement because it does not include income or expenses that are taxable or deductible in other years (including carried forward losses, if any) and also does not include non-taxable or non-deductible items.

Current income tax is recognized in the income statement except in cases where the income tax arises in connection with items directly recorded in equity. In that case, the current income tax is also directly recorded in equity.

Taxable profit is determined based on the business operating results after adjusting for non-taxable income and non-deductible expenses. The determination of taxable profit and current corporate income tax expenses is based on the current tax regulations. However, these regulations change over time, and the final determination depends on the audit results of the competent tax authority.

Other types of taxes are applied according to the current tax laws in Vietnam.

Related parties

Parties are considered related if one party has the ability to control or has significant influence over the other party in making decisions regarding financial and operational policies. The parties are also considered related parties if they are under common control or have significant common influence.

In reviewing the relationships of related parties, the nature of the relationships is given more emphasis than the legal form. All transactions and balances with related parties arising during the year are presented in the Notes below.
