No.	Content	Year 2025	Year 2024	Amount increase (+)/decrease (-)	Percentage (%)
7	Total accounting profit before tax	580,381,731,887	525,360,204,257	+55,021,527,630	Increased 10.47%
8	Profit after corporate income tax	576,303,792,197	515,323,295,337	+60,980,496,860	Increased 11.83%

Reasons: In the year 2025, profit after corporate income tax decrease compared to the year 2024 mainly due to the following reasons:

- Revenue from sales of goods and rendering of services decreased by 61.25%, while the cost of goods sold declined at a greater rate of 77.43% (mainly due to the impact of the Chau Duc Industrial Park infrastructure business), resulting in gross profit from sales of goods and rendering of services decreasing by only 25.48% compared to the same period.

- Financial income increased by 22.05%, due to higher dividends received from financial investment activities.

- Selling Expense decreased by 100% compared to the same period in 2024.

These factors contributed to a 10.47% increase in total accounting profit before tax and a 11.83% increase in profit after corporate income tax compared to the same period.

In the year 2025, profit after corporate income tax decrease compared to the year 2024 mainly due to the following reasons:

- Revenue from sales of goods and rendering of services increased by 15.72% compared to the same period last year, primarily driven by industrial park operations, port services, collection and treatment of waste.

- Cost of goods sold rose at a lower rate than revenue (up 7.29%), resulting in a 28.16% increase in gross profit from sales of goods and rendering of services compared to the same period last year.

- Share of the profit of associates increased by 61.54% compared to the same period last year.

These factors contributed to a 32.19% increase in total accounting profit before tax and a 31.85% increase in profit after corporate income tax compared to the same period.

2. BASIS OF PREPARATION

2.1. Accounting standards, accounting system

The accompanying consolidated financial statements, expressed in Vietnamese Dong ("VND"), are prepared under the historical cost convention and in accordance with Vietnamese Accounting Standards, Vietnamese Corporate Accounting System issued under Circular No. 200/2014/TT-BTC dated 22 December 2014, Circular No. 53/2016/TT-BTC dated 21 March 2016 and guidance on preparation and presentation of consolidated financial statements under Circular No. 202/2014/TT-BTC dated 22 December 2014 by Ministry of Finance, and prevailing accounting regulations in Vietnam.

The accompanying consolidated financial statements are not intended to present the consolidated financial position, consolidated results of operations and consolidated cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam.

2.2. Financial year

The Group's financial year is from 01 January to 31 December.

2.3. Reporting and functional currency

The Group maintains its accounting records in VND.

2.4. Basis of consolidation

The consolidated financial statements are the financial statements of a Group in which the assets, liabilities, equity, income, expenses and cash flows of the parent and subsidiaries are presented as those of a single economic entity regardless of the legal structure of the entities. The financial statements of the subsidiaries have been prepared for the same financial year using uniform accounting policies to those used by the parent company. Adjustments were made for any different accounting policies to ensure consistency between the subsidiaries and the parent company.

A subsidiary is fully consolidated from the acquisition date on which the Group obtains control over the subsidiary until the date on which the parent ceases to control the subsidiary, unless control is intended to be temporary because the subsidiary is acquired and held exclusively with the intention of selling or disposing of it within twelve months.

Non-controlling interest recognition

Non-controlling interests in the net assets and net results of consolidated subsidiaries are shown separately in the consolidated statement of financial position and in the consolidated income statement.

The loss of a subsidiary is attributed to the non-controlling interests in proportion to their relative interests in the subsidiary even if this results in the non-controlling interests having a deficit balance.

Profit or loss recognition in changes in ownership interests in subsidiaries

Changes in the Group's ownership interest in a subsidiary that do not result in the Group losing control are accounted for as equity transactions. The carrying amounts of the Group's and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiary. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity in the consolidated statement of financial position.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Upon loss of control of a subsidiary, the Group's profit or loss is calculated as the difference between the fair value of the consideration received and the respective carrying amount of the net asset of the subsidiary plus the remaining balance of goodwill at the date when control is lost.

Intra-group transactions elimination

All intra-group transactions, balances, income, and expenses - including unrealised intra-group profits or losses - are eliminated in full on consolidation. Unrealised losses resulting from intra-group transactions that are deducted in arriving at the carrying amount of assets are also eliminated unless the cost cannot be recovered.

3. SIGNIFICANT ACCOUNTING POLICIES**3.1. Foreign currencies**

- The exchange rates announced by banks of companies in the Group are applied in accounting;
- The exchange rate applicable to asset recognition and re-evaluation is the foreign currency-buying rate;
- The exchange rate applicable to liability recognition and re-evaluation is the foreign currency-selling rate.

Transactions in foreign currencies are recorded, on initial recognition, in the reporting currency, by applying to the foreign currency amount the spot exchange rate between the reporting currency and the foreign currency at the date of the transaction. The exchange differences arising on the settlement of monetary items are recognised in profit or loss in the year in which they arise. At the end of the reporting year, monetary items excluding advances to suppliers, prepaid expenses, and unearned revenues, which are denominated in foreign currency, are reported using the closing rate and resultant exchange differences resulting from the reporting after offset are recognised in profit or loss in the year in which they arise.

3.2. Use of estimates

The preparation of the consolidated financial statements requires management to make estimates and assumptions that impact the carrying value of certain assets and liabilities, contingent assets and liabilities reported in the notes at 31 December 2025 as well as revenues and expenses in the consolidated financial statements for the financial year ended 31 December 2025. Although these estimates are based on management's best knowledge of all relevant information available at the date when the consolidated financial statements are prepared, this does not prevent actual figures differing from estimates.

3.3. Cash and cash equivalents

Cash and cash equivalents comprise cash in hand, cash at bank and current investments for a period not exceeding 3 months or highly liquid investments which are readily convertible to known amounts of cash, and which are subject to an insignificant risk of changes in value.

Cash equivalents are defined the same as those under Accounting Standard No. 24 - Statement of cash flows.

3.4. Financial investments***Held to maturity investments***

Held to maturity investments comprise term deposits.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Equity investments in other entities

Investments in associates

Investments are classified as investments in associates when the Group directly or indirectly holds from 20% to under 50% of the voting shares of the investee without any other agreement.

Investments in associates are accounted for under the equity method. Under the equity method, on initial recognition the investment in an associate is recognised at cost. In case of investments of non-monetary assets, the cost of investments is recognised at the fair values of the assets as incurred. The carrying amount is increased or decreased to recognise the Group's share of profit or loss of the associate after the date of acquisition.

Distributions received from associates reduce the carrying amount of the investment.

Other investments

Investments classified as other investments are investments other than investments in subsidiaries, investments in associates or investments on joint ventures.

Other investments are accounted for under the cost method which comprise purchase prices plus (+) acquisition related costs (if any). In case of investments of non-monetary assets, the cost of investments is recognised at the fair values of the assets as incurred.

For equity investments in other entities

Provisions for impairment losses on equity investments in other entities are determined using fair values if the fair values can measure reliably. If the fair values cannot be measure reliably at the reporting date, provisions are measured on the basis of the investee's losses.
