The Board of Directors ensures compliance with the requirements of Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting Regime promulgated under Circular No. 200/2014/TT-BTC dated December 22, 2014 as well as the guiding circulars for implementing accounting standards of the Ministry of Finance in the preparation and presentation of the Consolidated Financial Statements.

IV. APPLIED ACCOUNTING POLICIES

1. Basis of preparation of Financial Statements

The financial statements are prepared on an accrual basis (except for information relating to cash flows).

2. Cash and cash equivalents

Cash includes cash on hand and demand deposits. Cash equivalents are short-term investments with a maturity of not more than 03 months from the date of investment, which are readily convertible into a known amount of cash and are not subject to the risk of changes in value in the process of converting them into money at the reporting date.

BA RIA - VUNG TAU WATER SUPPLY JOINT STOCK COMPANY

Address: No. 14, 30 Thang 4 Street, Ward 9, Vung Tau City, Ba Ria - Vung Tau Province

CONSOLIDATED FINANCIAL STATEMENTS

For the financial year ended on 2025-12-31

Notes to the Consolidated Financial Statements (continued)

3. Financial investments

Investments held to maturity

An investment is classified as held to maturity when the Company has the intention and ability to hold it until maturity. Held-to-maturity investments include: term deposits with banks (including promissory notes and bills of exchange), bonds, redeemable preference shares that the issuer is obligated to repurchase at a specific future date, and loans held to maturity for the purpose of collecting periodic interest and other held-to-maturity investments.

Held-to-maturity investments are initially recognized at cost, including purchase price and related transaction costs. After initial recognition, these investments are recognized at recoverable value. Interest income from held-to-maturity investments after the purchase date is recognized in the Statement of Profit or Loss on an accrual basis. Interest earned before the Company held is deducted from the cost at the time of purchase.

When there is conclusive evidence that part or all of the investment may not be recoverable and the amount of loss is reliably determined, the loss is recognized in financial expenses for the year and directly reduces the investment value.

Investments in associates

An associate is an entity over which the Company has significant influence but not control over its financial and operating policies. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control over those policies.

Initial recognition

Investments in associates are initially recognized at cost, including the purchase price or capital contribution plus directly attributable costs of the investment. In the case of investments in non-monetary assets, the cost of the investment is recorded at the fair value of the non-monetary assets at the time of occurrence.

Dividends from periods before the investment was acquired are accounted for as a reduction of the cost of the investment. Dividends from periods after the investment was acquired are recognized as revenue. Stock dividends received are only tracked for the number of shares increased, without recognizing the value of shares received.

Provision for impairment of investments in associates

Provision for impairment of investments in associates is made when the associate incurs losses, with the provision amount equal to the difference between the actual investment capital of the parties in the associate and the actual equity multiplied by the Company's actual contributed charter capital ratio in the associate. If the associate is subject to preparing consolidated financial statements, the basis for determining the impairment provision is the consolidated financial statements.

Increases or decreases in the provision for impairment of investments in associates that need to be made at the end of the financial year are recognized in financial expenses.

Investments in equity instruments of other entities

Investments in equity instruments of other entities include investments in equity instruments but the Company does not have control, joint control or significant influence over the investee.

BA RIA - VUNG TAU WATER SUPPLY JOINT STOCK COMPANY

Address: No. 14, 30 Thang 4 Street, Ward 9, Vung Tau City, Ba Ria - Vung Tau Province

CONSOLIDATED FINANCIAL STATEMENTS

For the financial year ended on 2025-12-31

Notes to the Consolidated Financial Statements (continued)

Investments in equity instruments of other entities are initially recognized at cost, including the purchase price or capital contribution plus directly related costs to the investment activity. Dividends from periods before the investment was acquired are accounted for as a reduction of the cost of the investment. Dividends from periods after the investment was acquired are recognized as revenue. Stock dividends received are only tracked for the number of shares increased, without recognizing the value of shares received.

Provision for losses on investments in equity instruments of other entities is made as follows:

- For investments in listed shares or where the fair value of the investment can be reliably determined, the provision is based on the market value of the shares.
- For investments where the fair value cannot be determined at the reporting date, the provision is made based on the investee's loss, with the provision amount equal to the difference between the actual contributed capital of the owners and the equity at the end of the financial year, multiplied by the ratio of the Company's charter capital to the total actually contributed charter capital in the other entity.

Increases or decreases in the provision for impairment of investments in equity instruments of other entities that need to be made at the end of the financial year are recognized in financial expenses.

4. Accounts receivable

Receivables are presented at book value less any provisions for doubtful debts.

The classification of receivables as trade receivables and other receivables is based on the following principles:

- Trade receivables reflect receivables of a commercial nature arising from purchase and sale transactions between the Company and buyers who are independent of the Company.
- Other receivables reflect receivables that are non-commercial in nature and not related to purchase and sale transactions.

Provision for doubtful debts is made for each doubtful debt based on the overdue age of the debts after offsetting against payables (if any) or the expected level of loss that may occur, specifically as follows:

- For receivables overdue for payment:
 - 30% of the value for receivables overdue from over 06 months to under 01 year.
 - 50% of the value for receivables overdue from 01 year to under 02 years.
 - 70% of the value for receivables overdue from 02 years to under 03 years.
 - 100% of the value for receivables overdue for 03 years or more.
- For receivables not yet overdue for payment but unlikely to be recovered: based on the expected level of loss to make provision.

Increases or decreases in the provision balance for doubtful debts that need to be made at the end of the financial year are recognized in enterprise management expenses.

5. Inventories

Inventories are stated at the lower of cost and net realizable value.

The cost of inventories is determined as follows:

- Raw materials and supplies: include purchase costs and other directly related costs incurred in bringing the inventories to their present location and condition.
- Work in progress: includes the cost of raw materials, labor costs, and other directly related costs.

The issue price is calculated using the weighted average method and accounted for using the perpetual inventory method.

BA RIA - VUNG TAU WATER SUPPLY JOINT STOCK COMPANY

Address: No. 14, 30 Thang 4 Street, Ward 9, Vung Tau City, Ba Ria - Vung Tau Province

CONSOLIDATED FINANCIAL STATEMENTS

For the financial year ended on 2025-12-31

Notes to the Consolidated Financial Statements (continued)

Net realizable value is the estimated selling price of inventories in the ordinary course of production and business less the estimated costs to complete and the estimated costs necessary to make the sale.

Provision for inventory obsolescence is made for each item of inventory with a cost greater than its net realizable value. Increases or decreases in the provision balance for inventory obsolescence that need to be made at the end of the financial year are recognized in cost of goods sold.

6. Tangible fixed assets

Tangible fixed assets are stated at cost less accumulated depreciation. The cost of tangible fixed assets includes all expenses that the Company incurs to acquire the fixed assets up to the point of bringing the assets to a ready-to-use condition. Subsequent expenditures are only recognized as an increase in the cost of the fixed asset if these expenditures are certain to increase future economic benefits from the use of that asset. Expenditures that do not meet the above conditions are recognized as production and business expenses in the year.

When tangible fixed assets are sold or disposed of, the original cost and accumulated depreciation are derecognized, and gains or losses arising from the disposal are recognized in income or expenses for the year.

Tangible fixed assets are depreciated using the straight-line method based on estimated useful lives. The depreciation periods for each type of tangible fixed asset are as follows:

<u>Type of fixed assets</u>	<u>Number of years</u>
Houses, structures	05 - 25
Machinery and equipment	05 - 10
Vehicles, transmission	06 - 30
Equipment, management tools	05 - 10

7. Construction in progress costs

Construction in progress costs reflect the costs directly related (including relevant borrowing costs in accordance with the Company's accounting policies) to assets under construction, machinery and equipment being installed for production, leasing and management purposes, as well as costs related to the repair of fixed assets in progress. These assets are recognized at cost and are not depreciated.

8. Accounts payable and accrued expenses

Accounts payable and accrued expenses are recognized for the amounts to be paid in the future for goods and services received. Accrued expenses are recognized based on reasonable estimates of the amounts to be paid.

The classification of payables into trade payables, accrued expenses, and other payables is based on the following principles:

- Trade payables reflect commercial liabilities arising from the purchase of goods, services, and assets, where the seller is an entity independent of the Company.
- Accrued expenses reflect liabilities for goods and services received from the seller or provided to the buyer but not yet paid due to the absence of invoices or complete accounting records and documents, and payables to employees for vacation pay, and accrued production and business expenses.
- Other payables reflect non-commercial liabilities not related to the purchase, sale, or provision of goods or services.

Accounts payable and accrued expenses are classified as short-term and long-term on the consolidated Balance Sheet based on the remaining term at the end of the fiscal year.

BA RIA - VUNG TAU WATER SUPPLY JOINT STOCK COMPANY

Address: No. 14, 30 Thang 4 Street, Ward 9, Vung Tau City, Ba Ria - Vung Tau Province

CONSOLIDATED FINANCIAL STATEMENTS

For the financial year ended on 2025-12-31

Notes to the Consolidated Financial Statements (continued)

9. Equity

Contributed capital of owners

Contributed capital of owners is recognized at the actual amount of capital contributed by shareholders.

Share premium

Share premium is recognized as the difference between the issuance price and the par value of shares upon initial or subsequent issuance, the difference between the reissuance price and the book value of treasury shares, and the equity component of convertible bonds at maturity. Direct costs related to the subsequent issuance of shares and the reissuance of treasury shares are deducted from the share premium.

10. Profit distribution

Profit after corporate income tax is distributed to shareholders after setting aside funds in accordance with the Company's Charter as well as legal regulations and as approved by the General Meeting of Shareholders.

The distribution of profits to shareholders takes into account non-monetary items within undistributed after-tax profits that may affect cash flow and dividend-paying ability, such as gains from the revaluation of assets contributed as capital, gains from the revaluation of monetary items, financial instruments, and other non-monetary items.

Dividends are recognized as liabilities when approved by the General Meeting of Shareholders.

11. Revenue and income recognition

Revenue from water supply

Revenue from water supply is recognized monthly based on the volume of water used according to the meter readings and the approved tariff of the People's Committee of Ba Ria - Vung Tau Province.

Revenue from service provision

Revenue from service provision is recognized when all of the following conditions are met simultaneously:

- Revenue can be determined relatively reliably. When the contract stipulates that the buyer has the right to return the purchased service under specific conditions, revenue is only recognized when those specific conditions no longer exist and the buyer does not have the right to return the provided service.
- The Company has or will receive economic benefits from the service provision transaction.
- The portion of work completed at the reporting date can be determined.
- The costs incurred for the transaction and the costs to complete the service provision transaction can be determined.

In the case where the service is performed over multiple periods, revenue is recognized in the period based on the results of the portion of work completed as of the accounting period end date.

Interest

Interest is recognized on a time basis and the actual interest rate for each period.

Dividends received

Dividends received are recognized when the Company has the right to receive dividends from capital contributions. Dividends received in shares are only tracked for the increased number of shares; the value of the shares received is not recorded.

BA RIA - VUNG TAU WATER SUPPLY JOINT STOCK COMPANY

Address: No. 14, 30 Thang 4 Street, Ward 9, Vung Tau City, Ba Ria - Vung Tau Province

CONSOLIDATED FINANCIAL STATEMENTS

For the financial year ended on 2025-12-31

Notes to the Consolidated Financial Statements (continued)

12. Construction contracts

A construction contract is a contract specifically negotiated for the construction of an asset or a combination of assets that are closely related or interdependent in terms of design, technology, function, or basic purpose of use.

When the outcome of a contract can be estimated reliably:

- For construction contracts stipulating that the contractor is paid according to the planned progress: revenue and expenses related to the contract are recognized corresponding to the portion of work completed as determined by the Company on the financial year end date.
- For construction contracts stipulating that the contractor is paid according to the value of the volume performed: revenue and expenses related to the contract are recognized corresponding to the portion of work completed that is confirmed by the customer and reflected on the invoice issued.

Increases or decreases in construction volume, compensation receipts, and other receipts are only recognized as revenue when they have been agreed upon with the customer.

When the outcome of a construction contract cannot be estimated reliably:

- Revenue is only recognized to the extent of contract costs incurred that are relatively certain to be recovered.
- Contract costs are only recognized as expenses when incurred.

The difference between the cumulative revenue of the construction contract recognized and the cumulative amount recorded on the payment invoice according to the planned progress of the contract is recognized as an amount receivable or payable according to the planned progress of the construction contracts.

12. Borrowing costs

Borrowing costs include interest on loans and other expenses incurred directly related to the loans.

Borrowing costs are recognized as expenses when incurred. In the event that borrowing costs are directly related to the investment in the construction or production of unfinished assets that require a sufficiently long period (over 12 months) to be put into use for their intended purpose or for sale, these borrowing costs are included in the value of that asset. For separate loans serving the construction of fixed assets or investment properties, interest expenses are capitalized even if the construction period is under 12 months. Income arising from the temporary investment of loans is recorded as a reduction of the original cost of the related assets.

For general loan capital used for construction investment or production of unfinished assets, capitalized borrowing costs are determined according to the capitalization rate for the weighted average accumulated costs incurred for basic construction investment or production of such assets. The capitalization rate is calculated according to the weighted average interest rate of outstanding loans during the year, excluding separate loans serving the purpose of forming a specific asset.

14. Expenses

Expenses are items that reduce economic benefits recognized at the time the transaction occurs or when it is relatively certain to arise in the future, regardless of whether money has been spent or not.

Expenses and the revenues they generate must be recognized simultaneously according to the matching principle. In the event that the matching principle conflicts with the prudence principle, expenses are recognized based on the nature and regulations of accounting standards to ensure that transactions are reflected truthfully and reasonably.

BA RIA - VUNG TAU WATER SUPPLY JOINT STOCK COMPANY

Address: No. 14, 30 Thang 4 Street, Ward 9, Vung Tau City, Ba Ria - Vung Tau Province

CONSOLIDATED FINANCIAL STATEMENTS

For the financial year ended on 2025-12-31

Notes to the Consolidated Financial Statements (continued)

15. Corporate income tax

Corporate income tax expense includes current income tax and deferred income tax.

Current income tax

Current income tax is the amount of tax calculated based on taxable income. Taxable income differs from accounting profit due to adjustments for temporary differences between tax and accounting, non-deductible expenses, as well as adjustments for non-taxable income and carried forward losses.

Deferred income tax

Deferred income tax is the amount of corporate income tax payable or recoverable in future periods arising from temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred income tax liabilities are recognized for all taxable temporary differences. Deferred income tax assets are recognized only when it is probable that taxable profit will be available in the future against which those deductible temporary differences can be utilized.

The carrying amount of a deferred income tax asset is reviewed at the end of each financial year and is reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred income tax asset to be utilized. Previously unrecognised deferred income tax assets are reviewed at the end of each financial year and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets and deferred income tax liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted by the end of the financial year. Deferred income tax is recognised in the statement of profit or loss, except to the extent that it relates to items recognised directly in equity.

Deferred income tax assets and deferred income tax liabilities are offset when:

- The company has a legally enforceable right to set off current tax assets against current tax liabilities; and
- The deferred income tax assets and the deferred income tax liabilities relate to income taxes levied by the same taxation authority:
 - On the same taxable entity; or
 - The company intends to settle its current tax liabilities and assets on a net basis, or to realise the asset and settle the liability simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

16. Related party

Parties are considered related if one party has the ability to control or exert significant influence over the other in making decisions about financial and operating policies. Parties are also considered related parties if they are under common control or common significant influence.

In considering the relationship of related parties, the substance of the relationship is given more importance than the legal form.

17. Segment reporting

A business segment is a separately identifiable component that is engaged in providing products or services and is subject to risks and rewards that are different from those of other business segments.
