Explanation of the Difference in Corporate
Income Tax Net Profit in Quarter III - 2025
in the Consolidated Financial Statements

Hanoi, October 30, 2025

To: - State Securities Committee;
- HNX Stock Exchange

Implementation of Circular No. 96/2020/TT-BTC dated November 16, 2020, issued by the Ministry of Finance on “Guidelines for Information Disclosure in the Securities Market, LICOGI CORPORATION - JSC hereby explains the Business Results in the Consolidated Financial Statements for Quarter III of 2025 as follows:

No	Description	Quarter III 2025	Quarter III 2024	Fluctuation (%)
		(VND Million)	(VND Million)	
1	Total revenue	711,719	469,387	51.6%
2	Total expenses	632,016	421,145	50.1%
3	Profit from business activities	79,703	48,242	65.2%
4	Other profit/loss	(2,460)	(3,179)	-22.6%
5	Total profit before tax	77,243	45,063	71.4%
6	Corporate income tax	3,679	2,968	24.0%
7	Profit before tax	73,564	42,095	74.8%

+ Explanation of Profit Difference Over 10%: The net profit after tax in the consolidated financial statements for the quarter II of 2025 recorded a gain of VND 73,564 billion, an increase VND 31,469 billion compared to the same period of 2024, mainly due to the following reason:

- Revenue of Parent company increased while the financial expenses and administration expenses decreased compared to the same period of 2024.
- Profit from associated companies increased: In the Quarter III/2025, Thang Long Industrial Park Co.’ Ltd distributed dividends.

Regards,

To:

- As above;
- BOD, The Supervisory Board (for report);
- Filed at the Head Office, Accounting Dep.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FORM 09/DN-HN

These notes are an integral part of and should be read in conjunction with the accompanying consolidated financial statement

1. GENERAL INFORMATION

Structure of ownership

Infrastructure Development and Construction Corporation - One Member Limited Liability Company (hereinafter referred to as "the Corporation"), formerly the Foundation Construction and Infrastructure Engineering Corporation, was established under Decision No. 998/BXD - TCLĐ dated November 20, 1995 of the Minister of Construction, a State-owned enterprise under the Ministry of Construction. The Corporation converted its model into a Joint Stock Company under Decision No. 2243/QĐ-TTg dated December 11, 2014 of the Prime Minister approving the equitization plan of the parent company - Infrastructure Development and Construction Corporation.

The Corporation has officially operated in the form of a Joint Stock Company with the name LICOGI Corporation - JSC according to the Business Registration Certificate No. 0100106440 registered for the third change on December 31, 2015 issued by the Department of Planning and Investment of Hanoi City with a charter capital of VND 900,000,000,000.

Head office of the Corporation: Building G1, No. 491 Nguyen Trai Street, Thanh Xuan Bac Ward, Thanh Xuan District, Hanoi City.

The Corporation's production and business activities include:

- Construction and Installation: underground works, irrigation works (dykes, dams, canals, reservoirs, irrigation systems, pipelines, pumping stations), hydroelectricity, thermal power, post office, water supply and drainage, urban and industrial park infrastructure technical works, drilling and blasting (Enterprises are only allowed to do business when permitted by competent State agencies);
- Investing in and developing projects on housing, urban areas, industrial parks, investing and developing technical infrastructure, investing in the construction of electricity works and trading in commercial electricity; investing and trading in office services, hotels, motels, tourism and entertainment services, managing and exploiting comprehensive services in new urban areas and concentrated residential areas;
- Construction and installation and general contractor for construction and installation of civil, industrial and traffic works (roads, railway bridges, road bridges, airports, ports, stations, tunnels);
- Researching the application and transfer of new technologies in the construction field, organizing training, retraining, fostering management staff, specialized technical workers, education and orientation to send Vietnamese workers and experts to work abroad for a limited period;
- Manufacturing, trading and importing and exporting mechanical products, materials, machinery, equipment, raw materials, types of construction materials, construction technology;
- Construction investment consultancy includes: planning, establishment and appraisal of construction investment projects, topographic survey, engineering geology, hydrogeology, design, preparation of total cost estimates for construction works, project management, technical supervision of construction, bidding consultancy and economic contracts on design, construction, installation, supply of materials and equipment; testing, quality inspection of works (excluding legal consultancy).

The main activities of the Corporation are construction and installation of works.

Normal production and business cycle

The normal production and business cycle of the Corporation is carried out within a period of no more than 12 months, except for some special projects of construction and real estate investment activities with a period of more than 12 months.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

2. ACCOUNTING CONVENTION AND FINANCIAL YEAR

The accompanying consolidated financial statements, expressed in Vietnam Dong (VND), are prepared under the historical cost convention and in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting.

The accompanying consolidated financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam.

The opening figures on January 1, 2025 are figures according to the 2024 financial statements audited by iCPA International Auditing Company Limited.

Fiscal year

The company's financial year begins from 01 January to 31 December.

3. ACCOUNTING STANDARDS AND SYSTEM APPLIED

On December 22, 2014, the Ministry of Finance issued Circular No. 200/2014/TT-BTC ("Circular 200") guiding the accounting regime for enterprises and Circular No. 202/2014/TT-BTC ("Circular 202") guiding the method of preparing and presenting consolidated financial statements. These circulars are effective for fiscal years beginning on or after January 1, 2015. Circular 200 replaces the provisions on the accounting regime for enterprises issued under Decision No. 15/2006/QĐ-BTC dated March 20, 2006 of the Ministry of Finance and Circular No. 244/2009/TT-BTC dated December 31, 2009 of the Ministry of Finance. Circular 202 replaces Part

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FORM 09/DN-HN

These notes are an integral part of and should be read in conjunction with the accompanying consolidated financial statement

XIII - Circular No. 161/2007/TT-BTC dated December 31, 2007 of the Ministry of Finance guiding the preparation and presentation of consolidated financial statements in accordance with Vietnamese Accounting Standard No. 25 "Consolidated financial statements and accounting for investments in subsidiaries". The Board of Directors has applied Circular 200 and Circular 202 in the preparation and presentation of consolidated financial statements for the period from July 1, 2024 to September 30, 2024.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies, which have been adopted by the Corporation in the preparation of these consolidated financial statements, are as follows:

Estimates

The preparation of consolidated financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting requires Board of General Directors to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the year. Although these accounting estimates are based on the Board of General Directors's best knowledge, actual results may differ from those estimates.

Basis of consolidation

The consolidated financial statements include the separate financial statements of the Corporation prepared for the period from 01 July 2025 to 30 September 2025 and the financial statements of the companies controlled by the Corporation (subsidiaries) prepared for the period from 01 July 2025 to 30 September 2025. Control is achieved when the Corporation has the power to govern the financial and operating policies of an investee company so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used in line with those used by the Corporation.

Intragroup transactions and balances are eliminated in full on consolidation.

Non-controlling interests consist of the amount of those non-controlling interests at the date of the original business combination (see below) and the non-controlling interests' share of changes in equity since the date of the combination. Losses in subsidiaries are respectively attributed to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Investments in associates

An associate is an entity over which the Corporation has significant influence and that is neither a subsidiary nor an interest in joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investor but not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these financial statements using the equity method of accounting. Interests in associates are carried in the balance sheet at cost as adjusted by post-acquisition changes in the Corporation's share of the net assets of the associate. Losses of an associate in excess of the Corporation's interest in that associate (which includes any long-term interests that, in substance, form part of the Corporation's net investment in the associate) are not recognised.

In the event that a member company of the Corporation conducts a transaction with an affiliated company of the Corporation, unrealized gains/losses corresponding to the Corporation's capital contribution to the associate company are eliminated from the consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FORM 09/DN-HN

These notes are an integral part of and should be read in conjunction with the accompanying consolidated financial statement

Joint Venture Investments

Joint venture investments are contractual arrangements whereby the Corporation and the participating parties undertake an economic activity under joint control. Joint control is understood as the making of strategic decisions relating to the operating and financial policies of the joint venture unit requiring the consent of the parties in joint control.

Joint venture agreements that involve the establishment of an independent business entity in which the parties in the joint venture contribute capital are called jointly controlled entities. The Company reports its interests in jointly controlled entities using the equity method.

Financial Instruments

Initial Recognition

Financial Assets: At the date of initial recognition, financial assets are recorded at cost plus transaction costs that are directly attributable to the acquisition of the financial assets. The Group's financial assets include cash, cash equivalents, trade receivables, loan receivables, other receivables and long-term financial investments.

Financial Liabilities: At the date of initial recognition, financial liabilities are recorded at cost plus transaction costs that are directly attributable to the issuance of the financial liabilities. The Group's financial liabilities include trade payables, accrued expenses, other payables, loans and finance leases.

Re-evaluation after initial recognition

Currently, there are no regulations on re-evaluation of financial instruments after initial recognition.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Financial investments

Loan receivables

Loan receivables are measured at cost less provision for doubtful debts. Provision for doubtful debts relating to loan receivables is made in accordance with prevailing accounting regulations.

Equity investments in other entities

Investments in equity instruments of other entities represent investments in equity instruments but the Corporation does not have control, joint control or significant influence over the investee.

Investments in equity instruments of other entities are presented in the Consolidated Balance Sheet at cost less allowance for impairment (if any). Provisions for investment depreciation are set aside in accordance with Circular No. 228/2009/TT-BTC dated December 7, 2009 of the Ministry of Finance on "Guidelines for the provision and use of provisions for inventory depreciation, losses in financial investments, bad debts and warranties for products, goods and construction works at enterprises", Circular No. 89/2013/TT-BTC dated June 28, 2013 of the Ministry of Finance on amending and supplementing Circular No. 228/2009/TT-BTC, Circular No. 200/2014/TT-BTC issued by the Ministry of Finance on December 22, 2014 ("Circular 200") guiding the accounting regime for enterprises and current accounting regulations.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FORM 09/DN-HN

These notes are an integral part of and should be read in conjunction with the accompanying consolidated financial statement

Receivables

Receivables represent the amounts recoverable from customers or other debtors and are stated at book value less provision for doubtful debts.

Provision for doubtful debts is made for receivables that are overdue for six months or more, or when the debtor is in dissolution, in bankruptcy, or is experiencing similar difficulties and so may be unable to repay the debt. In which, the provision for doubtful debts is based on the original repayment period under the original purchase contract, without regard to the extension of the debt between the parties.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using the specific identification method. Net realisable value represents the estimated selling price less all estimated costs to completion and costs to be incurred in marketing, selling and distribution.

Inventory value is determined according to the weighted average method. Inventories are accounted for using the regular declaration method.

The evaluation of necessary provision for inventory obsolescence follows current prevailing accounting regulations which allow provisions to be made for obsolete, damaged, or sub-standard inventories and for those which have costs higher than net realisable values as at the balance sheet date.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation.

The costs of purchased tangible fixed assets comprise their purchase prices and any directly attributable costs of bringing the assets to their working conditions and locations for their intended use. The costs of tangible fixed assets formed from construction investment by contractual mode or self-construction or self-generating process are the settled costs of the invested construction projects in accordance with the prevailing State's regulations on investment and construction management, directly-related expenses and registration fee (if any). In the event the construction project has been completed and put into use but the settled costs thereof have not been approved, the cost of tangible fixed assets is recognised at the estimated cost based on the actual cost incurred. The estimated cost will be adjusted according to the settled costs approved by competent authorities.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives as follows:

	<u>30/09/2025</u>
Buildings and structures	10 - 25
Machinery, equipment	03 - 15
Motor vehicles	02 - 10
Office equipment	03 - 10
Others	03 - 10

The Corporation's tangible fixed assets were re-evaluated when equitizing. The original cost and accumulated depreciation were adjusted according to the re-evaluation results approved by competent authorities in accordance with regulations.

Loss or gain resulting from sales and disposals of tangible fixed assets is the difference between profit from sales or disposals of assets and their residual values and is recognised in the income statement.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FORM 09/DN-HN

These notes are an integral part of and should be read in conjunction with the accompanying consolidated financial statement

Leases

A lease is classified as a finance lease when substantially all the risks and rewards of ownership are transferred to the lessee. All other leases are classified as operating leases.

The Group recognises finance leased assets as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is recognised in the consolidated balance sheet as a finance lease liability. Lease payments are apportioned between finance charges and principal repayments so as to achieve a constant periodic rate of interest on the remaining balance of the liability. Finance lease expenses are recognised in the income statement, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the Group's accounting policy on borrowing costs.

A lease is classified as an operating lease when the lessor retains a significant portion of the rewards and is subject to the risks of ownership. Operating lease expenses are recognised in the consolidated income statement on a straight-line basis over the lease term. Consideration received or receivable as an incentive to enter into an operating lease is also recognised on a straight-line basis over the lease term.

Assets held under finance leases are depreciated over their estimated useful lives in the same way as those held by the Group or over the lease term, whichever is shorter, as follows:

	<u>30/09/2025</u>
Buildings and structures	06 - 15
Machinery, equipment	10 - 15

Intangible assets and amortisation

Land use rights: intangible fixed assets represent the value of land use rights. Land use rights are allocated using the straight-line method based on the land lot's useful life.

Computer software: intangible fixed assets represent the value of computer software and are stated at cost less accumulated amortization. Computer software is allocated using the straight-line method based on the useful life from 02 years to 05 years.

The Corporation's intangible fixed assets were re-evaluated when equitizing State-owned enterprises. The original cost and accumulated depreciation were adjusted according to the re-evaluation results approved by competent authorities as prescribed.

Investment properties

Investment properties include land use rights and factories, buildings held by the Corporation for the purpose of earning rental income or for capital appreciation. Investment properties for lease are stated at cost less accumulated depreciation. Investment properties for capital appreciation are stated at cost less impairment.

The cost of purchased investment properties comprises the purchase price and directly attributable costs such as legal consultancy fees, property transfer tax and other related transaction costs.

Investment properties are apartments at 81/6 Vo Van Ngan, Linh Chieu Ward, Thu Duc District, Ho Chi Minh City, purchased for capital appreciation for sale.

Investment properties for lease are depreciated using the straight-line method over their estimated useful lives of 30 years.

Construction in progress

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FORM 09/DN-HN

These notes are an integral part of and should be read in conjunction with the accompanying consolidated financial statement

Properties in the course of construction for production, rental and administrative purposes or for other purposes are carried at cost. The cost includes any costs that are necessary to form the asset including construction cost, equipment cost, other directly attributable costs in accordance with the Corporation's accounting policy. Such costs will be included in the estimated costs of the fixed assets (if settled costs have not been approved) when they are put into use.

According to the State's regulations on investment and construction management, the settled costs of completed construction projects are subject to approval by appropriate level of competent authorities. The final costs of these completed construction projects may vary depending on the final approval by competent authorities.

Prepayments

Prepaid expenses include actual expenses that have been incurred but are related to the business performance of many accounting periods. Prepaid expenses mainly include prepaid land rent, major repair costs, business advantages and other long-term prepaid expenses.

Land rent represents the amount of rent that has been paid in advance. Prepaid rent is allocated to the Consolidated Income Statement on a straight-line basis over the lease term.

Major repair costs are allocated to the Consolidated Income Statement on a straight-line basis over two (02) years.

The value of business advantages reflects the business advantages arising when determining the enterprise value for equitization of the Parent Company, Dong Anh Mechanical Joint Stock Company and Electricity and Water Installation Joint Stock Company.

This business advantage is allocated to production and business expenses within 3 years from the date the above units officially operate as joint stock companies.

Other prepaid expenses include the value of tools, equipment, small components issued for use and other prepaid expenses that are considered to be able to bring future economic benefits to the Corporation. These expenses are capitalized as prepayments and allocated to the consolidated income statement, using the straight-line method in accordance with current accounting regulations.

Payable provisions

Provisions for payables are recognised when the Corporation has a present obligation as a result of a past event, and it is probable that the Corporation will be required to settle that obligation. Provisions are determined based on the Board of Directors' estimate of the expenditure required to settle the obligation at the balance sheet date.

Provision for construction warranty is provided at the rate specified in the construction contract, based on revenue recorded in the period for completed works, accepted and handed over in accordance with Circular No. 228/2009/TT-BTC dated December 7, 2009 of the Ministry of Finance.

Accrued expenses

Accrued expenses are recorded based on reasonable estimates of the amount payable for goods and services used during the period.

Accrued expenses include interest expenses, expenses payable for construction works and other payable expenses.

Interest expenses are estimated based on the loan amount, term and actual interest rate of each period.

Accrued expenses for construction works are expenses accrued in accordance with construction contract revenue recorded based on the minutes of acceptance of completed volume value between the Corporation and customers.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FORM 09/DN-HN

These notes are an integral part of and should be read in conjunction with the accompanying consolidated financial statement

Revenue recognition

Sales revenue

Revenue from the sale of goods is recognised when all five (5) following conditions are satisfied:

- (a) The Corporation has transferred to the buyer the significant risks and rewards of ownership of the goods;
- (b) The Corporation retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- (c) The amount of revenue can be measured reliably. When the contract stipulates that the buyer is entitled to return the products or goods, purchased under specific conditions, revenue is recognized only when those specific conditions no longer exist and the buyer is not entitled to pay return products and goods (except for cases where customers have the right to return goods in the form of exchange for other goods or services
- (d) The Corporation has obtained or will receive economic benefits from the sale transaction; and
- (e) The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Service revenue

Revenue of a transaction involving the rendering of services is recognised when the outcome of such transactions can be measured reliably. Where a transaction involving the rendering of services is attributable to several periods, revenue is recognised in each period by reference to the percentage of completion of the transaction at the balance sheet date of that period. The outcome of a transaction can be measured reliably when all four (4) following conditions are satisfied:

- (a) The amount of revenue can be measured reliably; When the contract stipulates that the buyer is entitled to return the products or goods, purchased under specific conditions, revenue is recognized only when those specific conditions no longer exist and the buyer is not entitled to pay return products and goods;
- (b) It is probable that the economic benefits associated with the transaction will flow to the Corporation;
- (c) The percentage of completion of the transaction at the balance sheet date can be measured reliably; and
- (d) The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Revenue from the Corporation 's construction contracts is recognised in accordance with the Corporation's accounting policy on construction contracts (see details below).

Financial revenue

Interest income is recognized on an accrual basis, determined on the balance of the deposit account and the interest rate applied.

Interest from investments is recognized when the Corporation has the right to receive the profit.

Construction contract

When the outcome of a construction contract can be estimated reliably and is certified by customers, revenue and costs related to the contract are recognized corresponding to the stage of completion of the work certified by customers during the period.

When the outcome of a construction contract cannot be estimated reliably, revenue is only recognized equivalent to the contract costs incurred and the recovery is relatively certain.

Revenue from the sale of real estate in which the Corporation is the investor is recognized when all five (5) following conditions are simultaneously satisfied (regardless of whether the legal procedures for the land use right certificate have been completed or not):

- (a) The real estate has been fully completed and handed over to the buyer, the Corporation has transferred the risks and rewards associated with the ownership of the real estate to the buyer;

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FORM 09/DN-HN

These notes are an integral part of and should be read in conjunction with the accompanying consolidated financial statement

- (b) The Corporation no longer holds the right to manage the real estate as the owner of the real estate or the right to control the real estate;
- (c) The amount of revenue can be measured reliably;
- (d) It is probable that the economic benefits associated with the transaction will flow to the Corporation;
- (e) The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Cost of goods sold recognition

The cost of goods sold for construction activities is determined based on the estimated gross profit ratio and revenue of the projects. After the project is completed and the final settlement with the investor is completed, the difference between the recorded cost of goods sold and the total actual investment cost of the project is adjusted to increase/decrease the cost of goods sold at the end of the period.

The cost of goods sold for real estate business activities is the right to use land and accompanying infrastructure transferred to customers, determined based on the estimated profit ratio of the projects and the revenue recorded in the period/or the estimated investment rate and business area. After the project ends its business period, the difference between the recorded cost of goods sold and the total actual investment cost of the project is adjusted to increase/decrease the cost of goods sold at the end of the year.

Foreign currencies

The Corporation applies the treatment of exchange rate differences according to the guidance of Vietnamese Accounting Standard No. 10 (VAS 10) "Effects of changes in exchange rates". Accordingly, transactions arising in foreign currencies are converted at the exchange rate on the date of the transaction. The balance of foreign currency-denominated monetary items at the end of the accounting period is converted at the exchange rate on this date. The arising exchange rate differences are recorded in the Consolidated Statement of Business Performance. The exchange rate difference gains from revaluation of balances at the end of the accounting period are not used to distribute to owners.

Borrowing costs

Borrowing costs are recognised in the income statement in the year when incurred unless they are capitalised in accordance with Vietnamese Accounting Standard No. 16 "Borrowing costs". Accordingly, borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the cost of those assets. For specific borrowings for the purpose of construction of fixed assets and investment properties, borrowing costs are capitalised even when the construction period is under 12 months.

Other borrowing costs are recognized in the consolidated income statement when incurred.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognised on significant differences between carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and are accounted for using balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FORM 09/DN-HN

These notes are an integral part of and should be read in conjunction with the accompanying consolidated financial statement

differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilized.

Deferred tax is calculated at the tax rates that are expected to apply in the year when the liability is settled or the asset realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Corporation intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.
